## Administrative Decisions

Nova Scotia Department of Fisheries and Aquaculture  
*Fisheries and Coastal Resources Act*, S.N.S. 1996, c. 25

The Nova Scotia Department of Fisheries and Aquaculture invites members of the public to provide written comment on applications for Aquaculture Licences and Leases. Selected details of the application(s) are as follows, with further information also found at <http://novascotia.ca/fish/aquaculture/public-information/>.

**Andrew Thompson, Jeremy Webb**  
AQ#1363  
Amendment Application

**Location:** Caribou Harbour, Pictou County  
**Type:** Marine  
**Current Size:** 5.00 HA  
**Current Cultivation Method:** Bottom cultivation without gear  
**Current Species:** American oyster  
**Proposed Amendment:** Authorize cultivation method – Bottom shellfish with gear method  
**Submission Period:** October 14, 2021 to November 12, 2021  
**Summary of Application:** Aquaculture Site No. 1363 has been an issued aquaculture site since May 21, 2014. At the time of initial issuance, the Aquaculture Licence and Lease Regulations did not distinguish between different shellfish aquaculture cultivation methods. As part of the 2015 amendments to the Aquaculture Licence and Lease Regulations, Bottom shellfish without gear and Bottom shellfish with gear were defined as separate cultivation methods. As part of a larger initiative to align existing

aquaculture methods with the updated regulatory language, the intent of this amendment application is for the applicant to become fully compliant with all relevant regulations and licensing and leasing requirements related to bottom shellfish aquaculture with gear. Such requirements will include marking the site in accordance with Transport Canada requirements. Furthermore, the standard licence and lease documents for shellfish aquaculture sites conducting bottom cultivation with gear allow for continued access to the aquaculture site by the general public for recreational activities; however, the general public are not permitted to carry out American oyster harvest, enhancement of husbandry activities on aquaculture sites.
