## Foreword

i

The Statistics Division of the Nova Scotia Department of Finance is the Nova Scotia Statistics Agency as defined by the Nova Scotia Statistics Act. The Division operates as the government's statistical focal point for liaison with Statistics Canada and for dissemination of general socio-economic and demographic information to provincial users, with a special emphasis on government needs.

Our mission in producing the annual Nova Scotia Statistical Review is to disseminate key Statistics Canada and other source data, thus providing a comprehensive overview of the province and its economic performance. The Review includes a very broad scope of statistical information, including population, labour force, prices and incomes, exports, education, tourism and other data. This Review provides a substantial amount of timely sub-provincial data to users annually.

### An Important Notice Regarding Sector Data: SIC/NAICS

With the implementation of the North American Free Trade Agreement, the statistical agencies of Canada, the United States and Mexico have developed a common statistical framework that facilitates analysis of the economic and industrial structures of the three economies. This new classification system is referred to as the North America Industry Classification System (NAICS) and, in Canada, is replacing the Standard Industrial Classification, 1980 (SIC 1980). Statistics Canada is well along in its long-term project to convert economic and industrial statistics from SIC 1980 to NAICS.

As the majority of key indicators including Gross Domestic Product by industry, employment by

industry, and public and private investment intentions have been converted to NAICS, the section layout of this issue of the Nova Scotia Statistical Review has used the NAICS classification for section divisions.

### Release Dates

Provincial Economic Accounts—November 7, 2002 is the release date for Statistics Canada, Provincial Economic Accounts, Catalogue No. 13-213. The estimates will be revised back to 1981 and will include estimates of real expenditure-based Gross Domestic Product (GDP) using the Fisher Volume Index formula, chained annually.

Gross Domestic Product by Industry—November 8, 2002 is the release date for Statistics Canada's GDP by Industry, Catalogue No. 15-213-XIB, for the period 1997-2001.

### An Important Notice Regarding the 2001 Census of Canada:

Census Day for the 2001 Census of Canada was May 15, 2001. The Canadian census is a unique undertaking with collection of information from approximately 30 million people scattered over 9 million square kilometres. For the first time, the 2001 Census collected information on same-sex couples, as well as, information on language of work. The release dates for the dissemination of the census results are as follow:

### *Census of Population*

*March 12, 2002*

A Profile of the Canadian Population: Where We Live (data on population, dwellings and geography)

*July 16, 2002*

Age and Sex

*October 22, 2002*

Marital Status of Canadians (data on marital status, common-law status)

Families and Household Living Arrangements (data on family structure, size, status and living arrangements)

Housing (data on private and collective dwellings, household maintainer, tenure)

*December 10, 2002*

Language Composition of Canada (data on mother tongue, home language, knowledge of official language and non-official language)  
Canadians on the Move (data on mobility, migration)

*January 21, 2003*

Immigration and citizenship (data on birthplace and birthplace of parents, country of citizenship, immigration status, period or year of immigration, age at immigration)  
Ethnocultural Portrait of Canada (data on ethnic origin, population group, visible minorities)  
Aboriginal Peoples of Canada (data on aboriginal identity, aboriginal origin, registered or treaty Indian, member of an Indian Band or First Nation)

*February 11, 2002*

Canada's Workforce: Paid Work (data on labour force activity, industry, occupation, class of worker, work activity during the reference year)  
Canada's Workforce: Unpaid (data on unpaid housework, child care and senior care)  
Place of Work (data on place of work status, workplace location)  
Commuting to Work (data on mode of transportation, commuting distance)  
Language Use at Work

*March 11, 2003*

Education in Canada: School Attendance and Levels of Schooling (data on school attendance, highest level of schooling, educational attainment)  
Education in Canada: Major Fields of Study  
Earnings of Canadians (data on wages and salaries, employment income)

*May 13, 2003*

Income of Individuals, Families and Households (data on total income, low income)  
Social and Economic: Characteristics of Individuals,

Families and Households (data on labour force activity of family members, educational attainment of family members and housing costs)  
Religions in Canada (data on religion)

*Census of Agriculture*

*May 16, 2002*

Farm Data (such as number of census farms, land management practices, crop areas, livestock and poultry numbers, farm finances)

*June 12, 2002*

Farm Data (data as above, plus census consolidated subdivisions)

*November 20, 2002*

Farm Operator Data (such as age and sex, farm and non-farm work, farm injuries)

*December 4, 2002*

Farm Operator Data (data as above, plus census consolidated subdivisions)

*Fall 2003*

Agriculture—Population Data (selected 2001 and historical data on socio-economic characteristics of farm operators, census farm families and households)

*May 15, 2002*

Census Agricultural Regions (cartographic boundary file that delineates the sub-provincial geographic areas created for disseminating agricultural statistics)

*Spring 2003*

Agricultural Ecumene of Canada (cartographic boundary file that delineates areas of significant agricultural activity in Canada for the 2001 Census of Agriculture)

*Spring 2004*

Canadian Agriculture at a Glance (short, analytical articles on the agricultural sector, accompanied by charts, tables, maps and full-colour photos)

In addition to the annual Nova Scotia Statistical Review, the Statistics Division maintains an Internet site, <http://www/gov.ns.ca/finance/statisti/INDEX.asp>, and regularly release numerous other publications.

We trust you will find the 2002 Nova Scotia Statistical Review a beneficial research tool. We welcome any comments or suggestions you may offer from your experience working with this publication.

Distribution of Canada Pension Dollars, by Type of Beneficiary, Nova Scotia, June 2002 .....	75
Government Transfer Payments to Persons, Nova Scotia, 1995–1999 .....	76
Canada Pension Plan Benefits, Canada and Nova Scotia, June 2002 .....	77
Old Age Security Benefits, Canada and Nova Scotia, June 2002 .....	78
Economic Dependency Profile, Canada and Nova Scotia, 2000 .....	79–80
Charitable Donors, Canada and the Provinces, 2000 .....	81

## **Sector Overview**

Gross Domestic Product , Goods & Service Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001 .....	82
Gross Domestic Product, Goods Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001 .....	82
Gross Domestic Product, Service Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001 .....	82
Gross Domestic Product at Market Prices, by Province, Canada, 1997–2001 .....	84
Gross Domestic Product by Industry, in 1997 Dollars, NAICS-based, Nova Scotia, 1997–2001 .....	85

## **Agriculture**

Farm Cash Receipts, Nova Scotia, 1997–2001 .....	86
Farm Product Price Index, Nova Scotia, 1997–2001 .....	86
Agricultural Highlights, Nova Scotia, 1995 and 2000 .....	88
Agricultural Highlights, Nova Scotia, 1996 and 2001 .....	89–90
Farms Classified by Total Farm Area, Regions by County, Nova Scotia, 2001 .....	91
Gross Farm Receipts, Nova Scotia, 2000 .....	92
Farms Classified by Computer Applications Used, Regions by County, Nova Scotia, 2001 .....	93
Farm Cash Receipts by Product, Nova Scotia, 1997–2001 .....	94
Farm Operating Expenses and Depreciation Charges, Nova Scotia, 1997–2001 .....	95
Farm Product Index, Nova Scotia, 1997–2001 .....	96
Greenhouse Industry, Nova Scotia, 1997–2001 .....	97
Aquaculture Production, Quantity and Value, Nova Scotia, 1997–2001 .....	98

## **Forestry**

Forestry Industries Manufacturing Shipments, Nova Scotia, 1998–2001 .....	99
Forest Production, by Round Product, Nova Scotia, 1997–2001 .....	99
Forestry Statistics, Canada and Nova Scotia, 1997–2001 .....	101
Forest Production by Round Product, Nova Scotia, 1997–2001 .....	101
Forest Production, Total Harvest, All Land Tenures, Regions by County, Nova Scotia, 2001 .....	102

## **Fishing**

Commercial Fish Landings, Quantity and Value, Percentage Change, Nova Scotia, 1996–1997 to 2000–2001 .....	103
Commercial Fish Landings by Species, by Quantity, Nova Scotia, 1997–2001 .....	104
Commercial Fish Landings by Species, by Value, Nova Scotia 1997–2001 .....	105
Fisheries Statistics, Nova Scotia, Regions by County, 2000 .....	106

## **Mining and Gas and Oil**

Mineral Production by Value, Nova Scotia, 1997–2001 .....	107
Mineral Production by Quantity, Nova Scotia, 1997–2001 .....	109
Mineral Production by Value, Nova Scotia, 1997–2001 .....	110
Marketable Gas Receipts, Canada and Nova Scotia, 1998–2001 .....	111

## **Utilities**

Total Electricity Generation, Nova Scotia, 1997–2001 .....	112
Electricity Generation by Type, Nova Scotia, 1997–2001 .....	113
Residential and Agriculture Sales of Electric Power, Canada and Nova Scotia, 1996–2000 .....	114

## **Construction and Capital**

Capital Expenditures, Percentage Change, Canada and the Provinces, 2001–2002 .....	115
Capital Expenditures, Canada, by Province, 1998–2002 .....	116
Capital Expenditures by Sector, Nova Scotia, 2000–2002 .....	117
Capital Expenditures on Construction, Nova Scotia, 1995–1999 .....	118
Housing Starts by Type, Nova Scotia, 1997–2001 .....	118
Housing Starts by Urban & Rural Centres, Nova Scotia, 1997–2001 .....	119
Value of Building Permits, Nova Scotia, 1997–2001 .....	120
Value of Building Permits by Sector, Regions by County, Nova Scotia, 2001 .....	120
Expenditures on Housing Repair & Renovation, Homeowner Households, Nova Scotia, 1995–1999 .....	121

## **Manufacturing**

Value of Manufacturing Shipments, Nova Scotia, 1997–2001 .....	122
Employment in Manufacturing, Nova Scotia, 1997–2001 .....	122
Value of Manufacturing Shipments by Industry Group, Nova Scotia, 1997–2001 .....	123
Manufacturing Statistics by Industry Group, Nova Scotia, 1999 .....	124
Number and Percentage Distribution of Principal Statistics, Manufacturing Establishments by Employment Size, Nova Scotia, 1999 .....	125

## **Trade**

Percentage Growth Rates, Exports by Major Destination and Total Imports, Nova Scotia, 1997–1998 to 2000–2001 .....	126
Retail and Wholesale Trade, Annual Percentage Change, Nova Scotia, 1997–2001 .....	126
Exports by Destination, Nova Scotia, 1997–2001 .....	128
Exports by Major Commodity Groupings, Nova Scotia, 1997–2001 .....	129
Imports, Nova Scotia as Province of Clearance, 1997–2001 .....	130
Merchandise Trade Exports, by Mode of Transport and Province of Clearance, Nova Scotia, 2001 .....	131
Retail Trade by Type of Store, Nova Scotia, 1997–2001 .....	132
New Motor Vehicle Sales by Value, Nova Scotia, 1997–2001 .....	132
Wholesale Trade, Canada and Nova Scotia, 1997–2001 .....	133
Domestic Sales of Refined Petroleum Products, by Type, Nova Scotia, 1997–2001 .....	133
Restaurant, Caterer and Tavern Receipts, Nova Scotia, 1997–2001 .....	134
Sales of Alcoholic Beverages, Nova Scotia, 1997–2001 (Years Ended March 31) .....	134

## **Transportation**

Total Water-Borne Cargo, Tonnage, Halifax Port Authority, 1997–2001 .....	135
Road Motor Vehicle Registrations, Nova Scotia, 1999–2001 .....	138
Road Motor Vehicle Registrations by County, Nova Scotia, December 31, 2001 .....	139
Driver's Licences and Dealer's Permits, Nova Scotia, March 31, 2001 .....	140
Ferry Passengers by Origin and Destination, Nova Scotia, 1997–2001 .....	140
Shipping Cargoes Handled at Nova Scotia Ports, 1995–1999 .....	140
Cruise Ship Activity, Port of Halifax, 1997–2001 .....	141
Tonnage, Total Water-Borne Cargo, Port of Halifax, 1999–2001 .....	141
Air Freight Handled at the Halifax International Airport, 1995–1999 .....	142
Air Carrier Passenger Traffic, Enplaned & Deplaned, Nova Scotia and Halifax International Airport, 1999 .....	142

## **Information and Cultural Industries**

Internet Use, Percentage of Households, Canada, Nova Scotia and Halifax, 2001 .....	143
Total Government Expenditures on Culture, by Level of Government, Nova Scotia, 1995–1996 to 1999–2000 .....	143

## Population and Demographics

1

### Population, Nova Scotia, July 1, 1986–2001

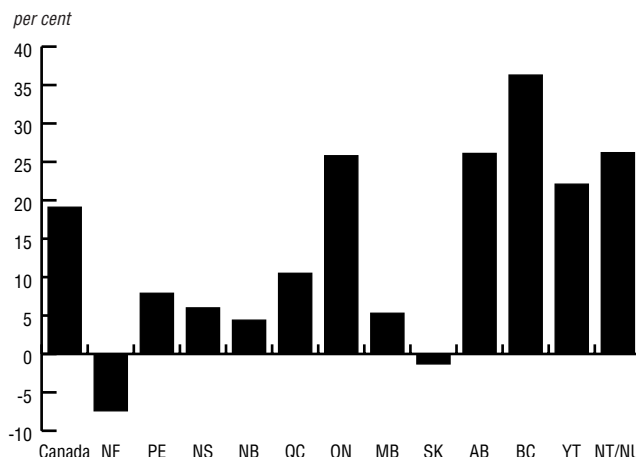

Source: Statistics Canada, *Annual Demographic Statistics, 2001*, Catalogue No. 91-213

- The July 1, 2001 population of the four Atlantic Provinces together represented an annual increase of 280 persons, little changed from 2000. The increase of 1,492 persons in Nova Scotia was a growth of 0.2% over the previous year. The province's 942,691 people represented 39.7% of the Atlantic Region and 3.0% of the Canadian population.
- In 2001, the 0-4 year age group represented 5.1% of Nova Scotia's population. The 5-19 year olds, 20-64 year olds and those 65+ represented 19.5%, 62.0% and 13.3% of the total population respectively.
- The population of the province has continued an ageing trend that is projected to carry well into the 21st century. Between 1991-2001, the population of prime labour force, aged 20-64 years, increased 6.4%. Youth under the age of twenty declined 8.5% over the same period, while seniors aged 65 and above showed a 10.2% increase in numbers.

- There were 9,348 births in the province in 2001, almost unchanged from 2000. The number of deaths increased 3.1% over the same period to 8,609 resulting in a natural increase of 739.
- Population growth continued to be greatest within the central area of the province. Between 1991 and 2001, the province's population increased 3.0%, while in the counties of Hants, Halifax and Kings County, it rose 10.8%, 10.1% and 7.8% respectively. Towns showing the greatest growth from 1991 to 2001 included Stellarton (85.7% with a population of 9,865), Bedford (40.6% with a population of 16,603), Wolfville (18.8% with a population of 4,194) and Stewiacke (13.4% with a population of 1,489).

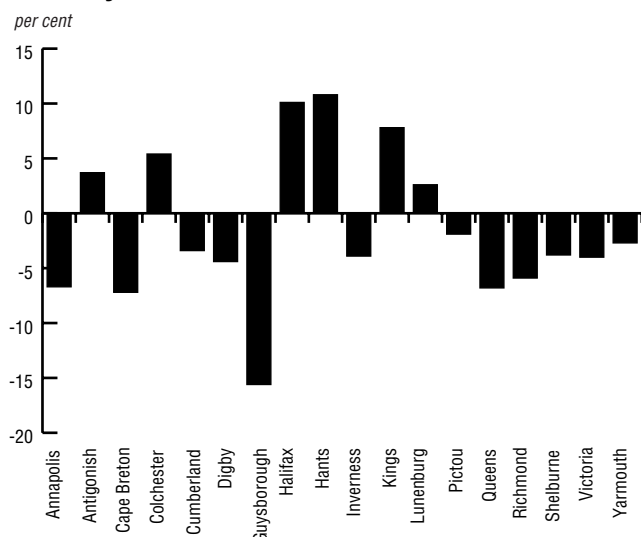

### Population Growth, Canada by Province, 1986–2001

Source: Statistics Canada, *Annual Demographic Statistics, 2001*, Catalogue No. 91-213

- Cape Breton Municipality with a population of 109,641 had a population change of -8.0% between 1991 and 2001.

## Population Growth, Nova Scotia by County, 1991–2001

Source: Statistics Canada, *Annual Demographic Statistics, 2001*, Catalogue No. 91-213 and *Estimates of Population*

- The twelve-month population growth of the province ending June 2001 was made up of a natural increase of 743, net international migration of 1,573 and net interprovincial migration of -824. This resulted in an increase of 1,492 persons.
- The estimated number of households in Nova Scotia for the year 2000 was 362,000, up 1.4% over 1999.
- Data released from the 2001 Census reported that there were 262,910 families in Nova Scotia in 2001, up 3.5% from 1996 and that there were 360,020 households, an increase of 5.1% over the same period.
- According to 2001 Census married couples (with or without children) represented 71.8% of families in Nova Scotia in 2001. This is a decline from the 75% reported in 1996 and the 84% seen in 1981.

Note that population data reflects “estimates” rather than 2001 Census figures. Census 2001 population figures will be revised later in the year to include under coverage inherent in all censuses. Future population estimates will then be adjusted to take into account the under coverage of the 2001 Census. Release dates for 2001 Census data include:

March 12, 2002 – Population and Dwelling Counts

July 16, 2002 – Age and Sex

October 22, 2002 – Marital Status, Common-law Status, Families, Dwellings, Households and Collectives

December 10, 2002 – Language, Mobility and Migration

January 21, 2003 – Citizenship, Immigration, Birthplace and Birthplace of Parents, Ethnic Origin, Visible Minorities and Aboriginal Peoples

February 11, 2003 – Labour Force Activity, Class of Worker, Occupation Industry, Place of Work, Mode of Transportation, Language of Work and Unpaid Work

March 11, 2003 – School Attendance, Education, Field of Study, Highest Level of Schooling and Earnings

May 13, 2003 – Religion, Income of Individuals, families and Households, Social and Economic Characteristics of Individuals, Families and Households and Shelter Costs

<sup>(1)</sup> For the 2001 Census, a private dwelling is defined as "a set of living quarters designed for or converted for human habitation in which a person or group of persons reside or could reside. In addition, a private dwelling must have a source of heat or power and must be an enclosed space that provides shelter from the elements, as evidenced by complete and enclosed walls and roof and by doors and windows that provide protection from wind, rain and snow."

<sup>(2)</sup> It should be noted that the creation of Cape Breton, Halifax and Queens Regional Municipalities has eliminated seven towns and three cities from the list of incorporated areas.

**Note:**

Census Family—refers to a married couple (with or without children of either or both spouses), a couple living common-law (with or without children of either or both partners) or a lone parent of any marital status, with at least one child living in the same dwelling. A couple living common-law may be of opposite or same sex. "Children in a census family include grandchildren living with their grandparent(s) but with no parents present.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Family Structure—refers to the classification of "census families" as noted in definition above.

**Note:**

Legal Marital Status—legal conjugal status of a person

Never Married (single)—persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

Legally Married (and not separated)—persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

Separated, but Still Legally Married—persons currently married, but who are no longer living with their spouse (for any reason other than illness or work) and have not obtained a divorce.

Divorced—persons who have obtained a legal divorce and who have not remarried.

Widowed—persons who have lost their spouse through death and who have not remarried.

Note:

Household Living Arrangements—refers to the classification of persons in terms of whether they are members of a family household or of a non-family household, and whether they are family or non-family persons.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Census Family Household—refers to the classification of census families according to the presence and number of additional persons in the household. Additional persons refer to any household member who is not a member of the census family being considered. These additional persons may be either members of another census family or non-family persons.

Two or more persons	12,915	--	10,725	1,710	385	85	10	28,590	2.2

**Note:**

Household Type—Category to which a person living alone or a group of persons occupying the same dwelling belong. There are two categories: non-family households and family households. A non-family household consists either of one person living alone or two or more persons who share a dwelling, but do not constitute a family (e.g., a couple with or without children). Family households are divided into two subcategories: one-family households and multiple-family households. A one-family household consists of a single family (e.g., a couple with or without children). A multiple-family household is made up of two or more families occupying the same dwelling.

Household Size—number of persons occupying a private dwelling.

Private Household—refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

**Note:**

Occupied Private Dwelling—a separate set of living quarters which has a private entrance either directly from outside or from a common hall, lobby, vestibule or stairway leading to the outside, and in which a person or a group of persons live permanently.

Period of Construction—refers to the period in time during which the building or dwelling was originally constructed.

## Labour Force

33

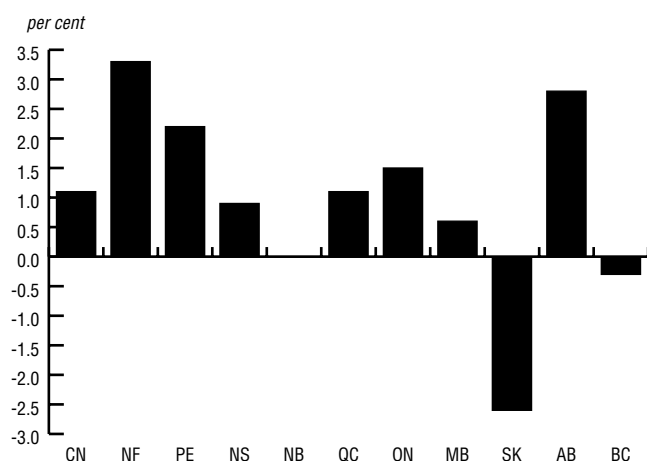

### Total Employment and Unemployment (excluding Military), Nova Scotia, 1997–2001

Source: Statistics Canada, *Labour Force Historical Review, 2001, CD-ROM*  
 No. 71F0004-XCB

- Employment in the province averaged 423,300 in 2001, a gain of 3,800 from 2000 (+0.9%) and 39,000 above the 1997 figure. Canada's employment stood at 15,076,800 in 2001, up 1.1% over the previous year.

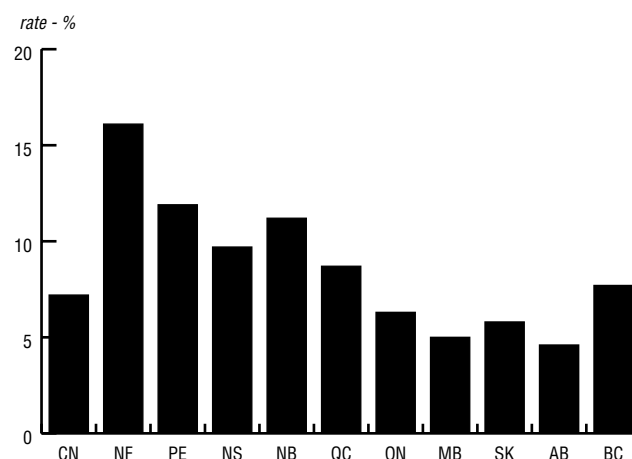

### Employment Growth, Canada and the Provinces, 2000–2001

Source: Statistics Canada, *Labour Force Historical Review, 2001, CD-ROM*  
 No. 71F0004-XCB

- There has been a 1.9% increase in full-time jobs while part-time positions declined 3.7% in Nova Scotia between 2000 and 2001.
- In 2001, the goods-producing sector represented 21.9% of total employment of the province. Employment in this sector fell by 100 people or 0.1% in 2001 over 2000. Since last year, this decline was offset by a 4.5% growth, or 1,100 more people employed, in the construction industry and an additional 0.6% or 400 employed in agriculture.

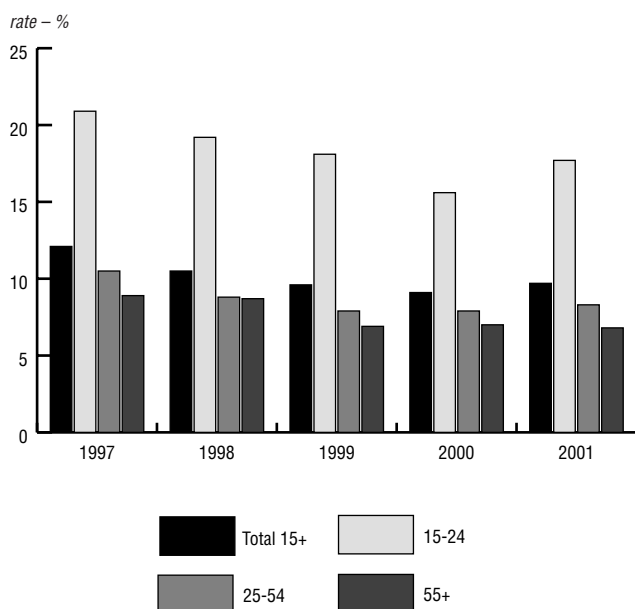

### Unemployment Rate, Canada and the Provinces, 2001

Source: Statistics Canada, *Labour Force Historical Review, 2001, CD-ROM*  
 No. 71F0004-XCB

- There were 3,800 more people employed in the service sector in 2001, a 1.2% increase over 2000. The most notable employment growth in this sector between 2000 and 2001 was an increase of 2,100 in accommodation and food services, 1,600 in trade, 1,400 in management of companies and administrative and other support services and 1,000 in information, culture and recreation.
- Nova Scotia's unemployment rate was 9.7% in 2001 (9.1% in 2000) while the national rate was 7.2% (6.8% in 2000). The unemployment rate declined in all provinces between 2000 and 2001.

## Unemployment Rate, by Age Groups, Nova Scotia, 1997–2001

- The Halifax Metro unemployment rate of was 7.0% in 2001. This was the lowest rate recorded of metro areas east of Ottawa-Hull.
- In 2001 the rate of unemployment fell in two of the five regions of the province—the Cape Breton region, where the rate was 17.0% in 2001 (down 0.5 percentage points from 2000) and the Annapolis Valley region where the rate was 7.8% (down 0.4 percentage points from 2000). The unemployment rate was 11.4% in the North Shore region of the province, 10.8% in the Southern region and 7.1% in the Halifax region.

<sup>(1)</sup> CV - Coefficient of variation is the standard error as a percentage of the estimated or the relative standard error. For LFS estimates, the CV is used to give an indication of the uncertainty associated with the estimates. Small CVs are desirable since the smaller the CV the smaller the sampling variability is relative to the estimate. The CV depends on the size of the estimate, the sample size that the estimate is based on and the distribution of the sample.

## Prices

47

### Consumer Price Index Growth, All Items and by Components, Nova Scotia 2000–2001

Source: Statistics Canada, *The Consumer Price Index, Catalogue No. 62-001*

- The Consumer Price Index (CPI) is defined as a measure of the percentage change through time in the cost of purchasing a constant “basket” of goods and services representing the consumption of a particular population group.<sup>(1)</sup> When prices increase, the purchasing power of money drops. When prices drop, it means the purchasing power of money increases. The CPI is frequently used to estimate the extent to which this purchasing power of money changes. For these reasons, it is a widely used measure of inflation or deflation. The CPI directly or indirectly affects nearly all Canadians:
  - Old Age Security pensions, Canada Pension payments and other forms of social and welfare payments are adjusted periodically to take account of changes in the CPI.
  - Rental agreements, spousal and child support payments and other forms of contractual and price-setting arrangements are frequently tied in some manner to movements in the CPI.
  - Cost-of-living adjustments (COLA) clauses link wage increases to movements in the CPI.
- Nova Scotia’s inflation (as measured by the all-items Consumer Price Index) rose 1.8% during 2001.

The Canadian rate of consumer price inflation was reported at 2.6%.

- Between 1991 and 2001, inflation in Nova Scotia fluctuated from a high of 6.1% in 1991 to a low of 0.6% in 1998. During this period, Canada’s ranged between 5.6% in 1991 and 0.2% in 1994.
- The consumer price index for the provinces and cities does not indicate which of the provinces or cities have higher or lower consumer price levels. Rather it indicates that some provinces or cities have higher or lower rates of consumer price change since the base period.
- The New Housing Price Index measures changes over time in the contractors’ selling prices of new residential houses, where detailed specifications remain the same between two consecutive periods. This series surveys 21 metropolitan areas across the country. The survey also collects contractors’ estimates of the current cost of the land. The residual (selling price less land), which mainly relates to the current cost of the structure, is also independently indexed and is presented as the house series. The lots are serviced by builders; therefore, the servicing costs do not enter into the contractors’ selling prices.
- In 2001 the total New Housing Price Index in metropolitan Halifax, 118.4 (1992=100), represented a 2.9% increase over 2000. The Canada index, 106.1 (1992=100), increased 2.8%.
- Statistics Canada’s Survey of Spending, 2000 reported average household expenditures in Canada totaled \$55,834 in 2000. The corresponding figure in Nova Scotia was \$48,623 in Nova Scotia and \$56,997 in Halifax Metro. Within total current consumption, shelter represented 18.0% of total expenditures in Nova Scotia, compared to 18.8% in both Canada and Halifax Metro. Transportation represented 13.6% of total expenditures in Canada 13.6% as compared to 14.2% in Nova Scotia and 11.9% in Halifax Metro. Another major component of expenditures, food, was 11.1%, 11.4% and 10.1% of Canada, Nova Scotia and Halifax Metro respectively.

## New Housing Price Index<sup>(1)</sup>, Canada and Halifax (1992=100), 1997–2001

Year <sup>(2)</sup>	Total	Canada Housing	Land	Total	Halifax Housing	Land
1997	99.1	99.0	101.4	107.2	107.9	104.4
1998	100.1	100.5	101.8	108.0	109.0	105.5
1999	101.0	101.9	102.0	111.5	112.8	108.9
2000	103.2	105.1	102.7	115.1	117.3	110.0
2001	106.1	108.8	103.7	118.4	120.8	112.5

<sup>(1)</sup> These indexes measure changes over time in the contractors' selling prices of new "residential houses, where detailed specifications remain the same between two consecutive" periods. This series surveys 21 metropolitan areas across the country. The survey also collects contractors' estimates of the current cost of the land. The residual (selling price less land) which mainly relates to the current cost of the structure is also independently indexed and is presented as the house series. The lots are serviced by builders and therefore the servicing costs do not enter into the contractors' selling price.

<sup>(2)</sup> Annual figures were calculated from an average of monthly data.

## Income

52

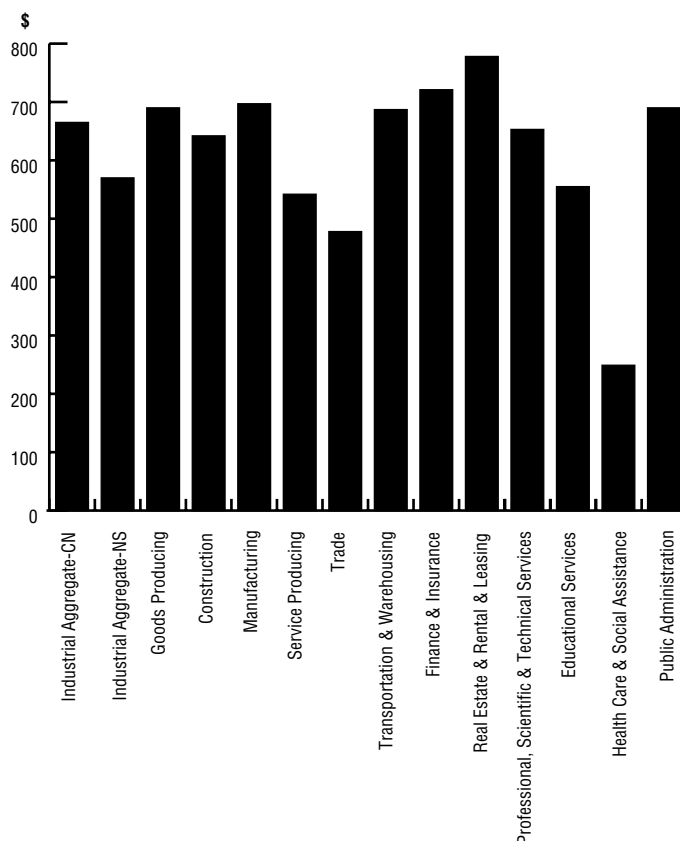

### Average Income Per Tax Filer, All Income Tax Returns, Regions of Nova Scotia, 1999

Source: Canada Customs & Revenue Agency, 1999 Taxation Statistics

- Total personal income in Nova Scotia advanced 3.2% in 2001. On a per capita basis, the increase was 2.9%. For Canada, total personal income registered a 3.8% gain in 2001, while per capita income increased 2.8%.
- In Nova Scotia during 2001 labour income (wages and salaries as well as supplementary labour income), at \$13,517.4 million, was up 3.9% over 2000. Robust growth in income has arisen from higher employment and average wages. In 2001 the average earnings for all employees in Nova Scotia rose to \$569.61, an increase of \$10.73 or up 1.9% from 2000. Canada's average earnings increased 1.8% as well, increasing by \$11.52 to \$665.12.

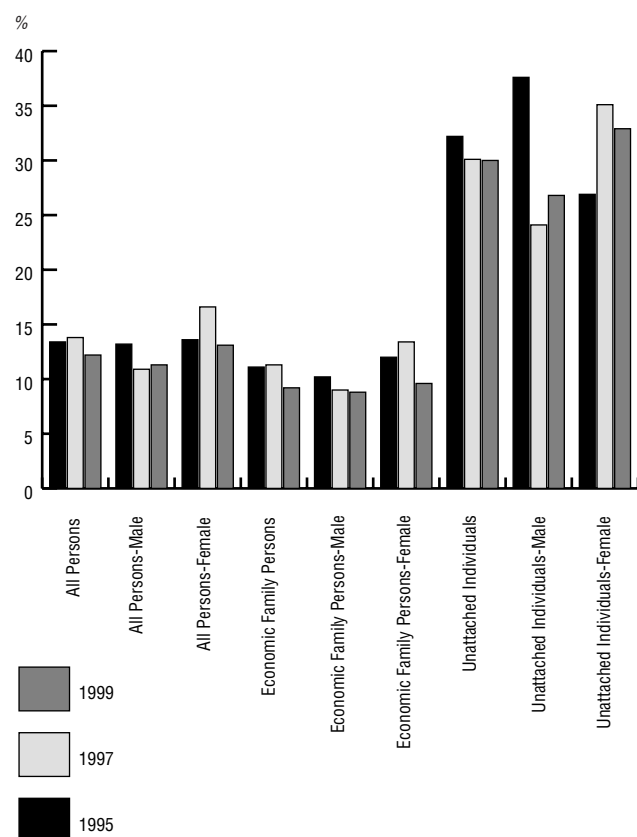

### Average Weekly Wages and Salaries by Industrial Aggregate and Selected Industries, Nova Scotia, 2001

Source: Statistics Canada, *Employment, Earnings & Hours*, Catalogue No. 72-002.

- Canada Customs & Revenue Agency reported the 1999 average income per all tax filers in Nova Scotia was \$25,425. This compared to \$29,961 in the Halifax Region, the most populated region of the province. The Small Area and Administrative Data Division of Statistics Canada derives various data sets using taxation filer information including special tabulations for its labour force income profile series and neighbourhood income and demographic profile series (see pages 66 - 74). Of the 909,720 taxfilers and dependents in Nova Scotia in 2000, 11% reported total income of \$50,000+. Average age of taxfilers and dependents was 38 and, of all taxfilers and dependents, 52% were female, 41% were married and 4% lived in an apartment.

## Prevalence in Low Income After Tax (1992 LICOs Base), Nova Scotia, 1995–1999

- Low Income Cut-offs (LICOs) are one alternative for measuring the size, incidence and composition of the low income population; however, they are quite different from measures of poverty. Corresponding data available for 1995-1999 shows the most marked increase in the prevalence of low income is among females. Between the all persons, economic family persons and unattached individuals categories, the prevalence of low income was most significant among female unattached individuals increasing from 26.9% in 1995 to 32.9% in 1999.

NOTE: Low Income Measures (LIMs) are one alternative to the traditional Low Income Cut-offs (LICOs) for measuring the size, incidence and composition of the low income population.

Recently there has been extensive and recurring media coverage of Statistics Canada's Low Income Cut-offs and their relationship to the measurement of poverty. At the heart of the debate is the use of the LICOs as poverty lines. Statistics Canada has clearly and consistently emphasized, since their publication began over 25 years ago, that the LICOs are quite different from measures of poverty. They reflect a consistent and well defined methodology which identifies those who are substantially worse off than the average. In the absence of an accepted definition of poverty, these statistics have been used by many analysts who wanted to study the characteristics of the relatively worse off families in Canada. These measures have enabled Statistics Canada to report important trends such as the changing composition of this group over time.

## Income Security

75

### Distribution of Canada Pension Dollars, by Type of Beneficiary, Nova Scotia, June 2002

Source: Health and Welfare Canada, *Income Security Programs, Monthly Statistics, June 2002*

- Further information on “Income Support” is available on the Human Resources Development Canada website <http://www.ns.hrdc-drhc.gc.ca/english/index.htm>
- The Small Area and Administrative Data Division of Statistics Canada derives various data sets using taxation filer information including special tabulations for its economic dependency profile series (see pages 79–80).
- Nova Scotia beneficiaries under the Canada Pension Plan in June 2002 numbered 194,962. This represented 4.6% of Canada’s total beneficiaries that received payment from the Plan that month. The gross amount paid for benefits in Nova Scotia in June 2002 was \$82.0 million and accounted for 4.6% of this National Plan’s total payout that month. The major amount of benefit payments in Nova Scotia under the Plan were:
  - Retirement benefits – 60.4%
  - Disability benefits – 20.4%
  - Survivor benefits – 14.9%
- The 126,444 Nova Scotians that received Old Age Security Pension during June 2002 represented 3.2% of Canada’s total recipients. The 58,109 people in the province that received the Guaranteed Income Supplement accounted for 4.0% of Canada’s total beneficiaries. Spouse’s Allowance benefits were distributed to 4,424 people in Nova Scotia, representing 4.7% of all people receiving from the National Pension in June 2002.

## Economic Dependency Profile, Canada and Nova Scotia, 2000 (*continued*)

### Glossary of Terms

*Canada Child Tax Benefit (CCTB)* is a system that replaces (beginning with the 1993 data year) the previous federal Family Allowance program, the non-refundable child deduction and refundable Child Tax Credit. It is an income supplement for individuals who have at least one qualified dependent child. The Canada Child Tax Benefit is also based on the individual's family income and the number of dependent children.

*Canada/Quebec Pension (CPP/QPP)* are compulsory contributory social insurance plans that protect workers and their families against loss of income due to retirement, disability or death. Canada Pension Plan and Quebec Pension Plan benefits include all benefits reported for the reference year.

*Economic Dependency Ratio (EDR)* is the sum of transfer payments received as benefits in a given area, compared to every \$100 of employment income for that same area. For example, where a table shows an Employment Insurance (EI) dependency ratio of 4.69, it means that \$4.69 in EI benefits were received for every \$100 of employment income for the area.

*Employment Income* includes wages and salaries, commissions for employment, training allowances, tips and gratuities, and self-employment income (net income from business, profession, farming, fishing and commissions).

*Employment Insurance* (previously Unemployment Insurance or UI) comprises all types of benefits paid to individuals under this program, regardless of reason, including regular benefits for unemployment, fishing, job creation, maternity, parental/adoption, retirement, self-employment, sickness, training and work sharing.

*Goods and Services Tax (GST) Credit* includes all amounts received through this program. Beginning in 1997, the GST was harmonized with the provincial sales taxes in Newfoundland, Nova Scotia and New Brunswick and became the Goods and Services Tax/Harmonized Sales Tax (GST/HST) credit.

*Government Transfer Payments*, for the purposes of these data, denote the following payments made to individuals by the federal or provincial governments: Employment Insurance, GST credit, Canada Child Tax benefit, Old Age Security pension/net federal supplements, Canada and Quebec Pension plans, Workers Compensation, Social Assistance and non-taxable income and provincial refundable tax credits. The individuals in this case receive these payments without providing goods or services in return. Previous to the 1996 data, "transfer payments" also included superannuation and other (private) pensions.

*Old Age Security (OAS) Pension* is part of the Old Age Security program, a federal government program that guarantees a degree of financial security to Canadian seniors. All persons in Canada aged 65 or older, who are Canadian citizens or legal residents, may qualify for a full OAS pension, depending on their years of residence in Canada after reaching age 18. Old Age Security benefits include all benefits reported for the reference year, excluding Guaranteed Income Supplements and Spousal Allowance benefits.

*Provincial Refundable Tax Credits* unlike nonrefundable tax credits, are amounts paid to the taxfiler, regardless of tax liability.

*Social Assistance* includes payments made in the year on the basis of a means, needs or income test (whether made by an organized charity or under a government program).

*Workers' Compensation* includes any compensation received under Workers' Compensation in respect of an injury, disability or death.

## Sector Overview

82

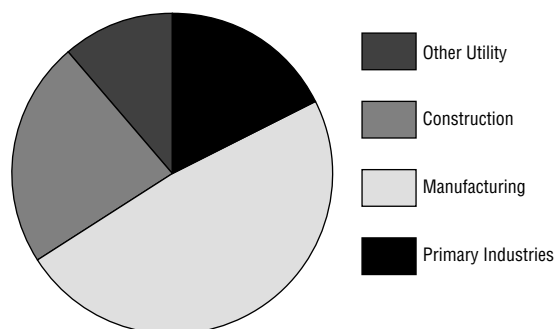

### Gross Domestic Product, Goods & Service Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001

Source: Statistics Canada, *System of National Accounts, Provincial Economic Accounts, Annual Estimates 2001 Catalogue No. 13-213-PPB*

- The Nova Scotia economy is predominantly service-based. In 2001<sup>(1)</sup>, 76.5% of the provincial economy was within the services producing sector, while the remaining 23.5% was in the goods producing sector. The goods producing sector includes manufacturing, construction, primary industries, and utilities. The services producing sector includes a wide range of business and personal services, health and educational services, public administration, defense and other federal departments.

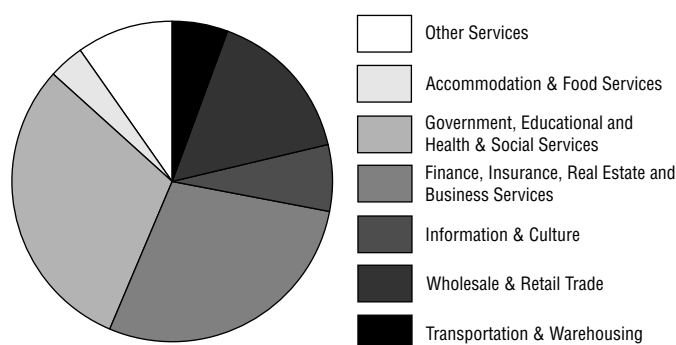

### Gross Domestic Product, Goods Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001

Source: Statistics Canada, *System of National Accounts, Provincial Economic Accounts, Annual Estimates 2001, Catalogue No. 13-213-PPB*

- The provincial economy expanded by 13.2% between 1997 and 2001. While the Gross Domestic Product (GDP) in the goods producing sector grew by 17.0% during this period, the GDP in the services producing sector grew by only 12.1%.

### Gross Domestic Product, Service Producing, at Factor Cost, in 1997 Dollars, Nova Scotia, 2001

Source: Statistics Canada, *System of National Accounts, Provincial Economic Accounts, Annual Estimates 2001, Catalogue No. 13-213-PPB*

- Although the growth in both sectors was relatively slow<sup>(1)</sup> from 1997 to 2001, an average annual growth in the goods producing sector was much faster than in the services producing sector, 4.1% and 2.9%, respectively (table 1). As a result, the services sector share of provincial economy, expressed by the share of provincial GDP<sup>(2)</sup>, decreased by 0.8% from 77.3% in 1997 to 76.5% in 2001, while the goods producing sector share increased at the same time from 22.7% to 23.5%, despite of the decline in some primary industries, excluding mining, oil and gas and support activities for forestry (table 1).
- The leading fast growing sector in the province was information and cultural services, with an average annual GDP growth of 11.1% for 1997-2001. The provincial share of GDP for this industry increased from 3.8% in 1997 to 5.1% in 2001.

<sup>(1)</sup> An annual provincial GDP growth below 5% was considered slow, between 5%-10% medium, and above 10% high.

<sup>(2)</sup> In 1997 dollars.

- By contrast, public administration, educational services, logging and forestry and support activity for forestry experienced economic difficulty and decline, as shown by the negative average annual growth of -0.7%, -0.6%, -6.0% and -3.2%, respectively for the same time period.
- The most significant decline in the provincial share of GDP was observed in the public administration, which declined by 1.6% from 11.7% of provincial GDP in 1997 to 10.1% in 2001. Educational services share of provincial GDP decreased by 0.9% from 6.5% in 1997 to 5.6% in 2001.
- The logging and forestry experienced the largest decline in the average annual GDP in 1997-2001. Since this sector accounts for only a small percentage of Nova Scotia economy, the negative average annual growth in GDP of -6.0% resulted in the declining share of provincial GDP by only 0.1% from 0.4% in 1997 to 0.3% in 2001.
- The medium growth<sup>(3)</sup> in GDP in 1997-2001, was observed in wholesale trade, manufacturing, as well as in mining, oil and gas industries, which grew at the average annual growth rate of 6.7%, 5.7% and 5.0%, respectively. The significant decline in mining industry in 1998 and 1999 was more than offset by expanding new oil and gas industry in 2000 and 2001. The growth in the remaining industries was relatively small over the same time period.

**Table 1 - Average annual growth in GDP by industry and shares of provincial GDP by industry, Nova Scotia, 1997- 2001.**

### Farm Cash Receipts, Nova Scotia 1997–2001

\$millions

Source: Statistics Canada, *Farm Cash Receipts*, Catalogue No. 21-001XIB and *Agriculture Economic Statistics*, Catalogue No. 21-603-UPE

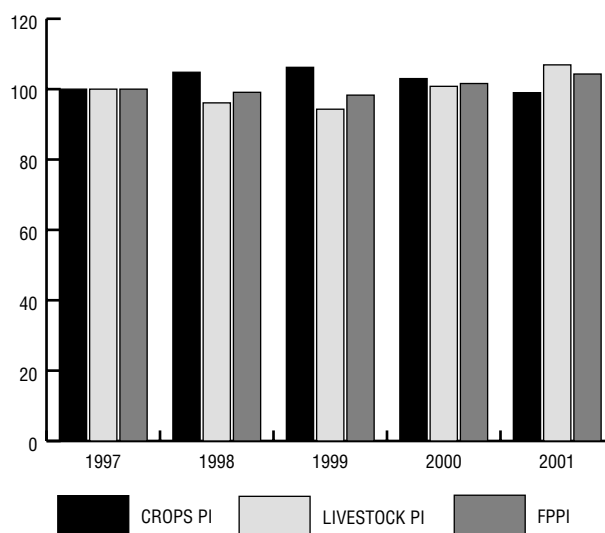

**Refer to page (i) of the introductory section of this publication for an important notice about sector data.**

- The 2001 Census of Canada counted 3,923 farms in Nova Scotia. This figure was down 11.9% from 1996. The area of farmland (crops including summer fallow and pastures) was reported as 433,836 acres in 2001, up by 1,636 acres from 1996. Average farm size (all types of land) increased from 237 acres in 1996 to 256 acres in 2001. In 2001, 29.6% of the province's farm area was concentrated in the Annapolis Valley (Annapolis, Hants and Kings County).
- The 2001 Census of Canada reported Nova Scotia's total gross farm receipts were \$460 million in 2000. Nearly 22% of farms were classified with \$100,000 or more total gross farm receipts. Cattle farms represented 23% of all farms and fruit farms accounted for 20% of all farms. The area in apples has declined 18.9% from 1996; however, the acreage in blueberries has increased 23.9%. Blueberries represent 81% of Nova Scotia's fruit acreage. The province is recognized as the nation's largest producer of blueberries, producing 35% of the Canada's crop. Although Nova Scotia had more area devoted to Christmas tree production than any other province in Canada in 2001, the 535 farms in the province producing Christmas trees represented a decline of 18.1% from 1996.

- In 2001 GDP in agriculture (crop and animal production) decreased 10.5% to \$182.3 million. GDP for support activities for agriculture and forestry declined 8.1% to \$19.2 million.
- Capital investment in crop and animal production fell 1.0% to \$40.5 million in 2001 and is expected to return to its 2000 level of \$40.9 million in 2002. Capital investment in support activities to agriculture and forestry decreased from \$1.1 million in 2000 to \$0.9 million in 2001.
- Between 1998 and 2000 employment in the agriculture sector was unchanged at 6,000. In 2001 employment in the sector rose 5.8% to 7,300 persons.
- Total wages and salaries in the agriculture, forestry, fishing and hunting sectors were \$237.3 million in 2001, a decline of 3.2% over 2000.

### Farm Product Price Index, Nova Scotia, 1997–2001

(1997 = 100)

Note:  
 Crops PI - Crops Price Index  
 Livestock PI - Livestock Price Index  
 FPPI - Farm Product Price Index

Source: Statistics Canada, *Agriculture Economic Statistics*, Catalogue No. 21-603-UPE

- Farm cash receipts in 2001 increased 1.6% (\$6.7 million) to \$421 million. Compared to 2000, in 2001, receipts from crops declined 14.5% to \$98.2 million, total livestock and products rose 7.2% to \$280.8 million while forest and maple products (including Christmas trees) fell 4.0% to \$24.3 million. In 2001 assistance to farmers increased 46.5% over 2000 to \$17.5 million.
- Although farm wages (cash wages, room and board) were down 0.2% from 2000 to \$84.6 million in 2001, this figure was 13.8% over 1997.
- In 2001 the farm product price index (1997=100) rose 2.7% to 104.3. While crop prices declined 3.9% over 2000, livestock prices increased 6.1%.
- There were 125 greenhouses in Nova Scotia in 2001 that employed 1,200 people. Total greenhouse sales of \$36.6 million included \$5.8 million in greenhouse vegetables and \$30.8 million in ornamental and plant sales.
- Aquaculture is a fast growing industry in Nova Scotia. Tonnage increased 61.4% in 2000 over 1999 to 10,456 tonnes while value rose 55.9% to \$43.5 million during the same period. Finfish made up 88.1% of total value of aquaculture production while shellfish accounted for 11.9%.

<sup>(1)</sup> Data are reported on Census Day for the preceding calendar or fiscal year.

<sup>(2)</sup> As in previous censuses, response errors have resulted in an under-reporting of total gross farm receipts. However, the data are comparable with previous censuses.

<sup>(3)</sup> At 2000 prices.

<sup>(4)</sup> "Gross farm receipts" excludes forest products sold.

<sup>(5)</sup> Due to response errors in previous censuses, the sales of forest products may have been overstated. Changes to this question for 2001 limit the comparability of the data to previous censuses.

<sup>(6)</sup> As in previous censuses, response errors are common for the paid work question because of the variety of arrangements in hiring farm labour. However, the data are comparable with previous censuses.

<sup>(7)</sup> Conversion factor: 1 hectare is equivalent to 2.471 acres.

<sup>(8)</sup> Excludes Christmas tree area.

<sup>(9)</sup> Respondents could report more than one application

<sup>(10)</sup> As in previous censuses, the area of land on which herbicides, insecticides, fungicides and commercial fertilizer were applied is under-reported. However, the data are comparable with previous censuses.

<sup>(11)</sup> As in 1995, the area of land on which manure was applied using each manure application method was under-reported. However, the 1995 and 2000 data are comparable.

## Forestry

99

### Forestry Industries Manufacturing Shipments, Nova Scotia, 1998–2001

\$millions

Source: Statistics Canada, *Monthly Survey of Manufacturing*, Catalogue No. 31-001-XPB

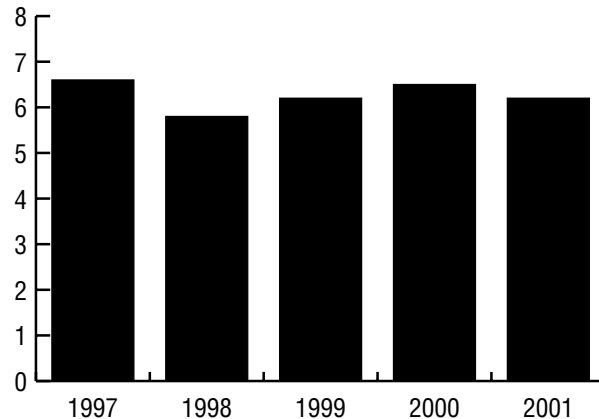

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- GDP in the logging and forestry sector during 2001 declined 3.2% from 2000 to \$61.1 million. GDP in support activities for agriculture and forestry fell 8.1% to \$19.2 million.
- A 2001 revised intention for capital investment in forestry and logging has not been released due to confidentiality; however the preliminary actual figure of \$4.6 million represented an 27.8% increase over 2000. Capital expenditures in support activities for agriculture and forestry were reported at \$1.1 million in 2000 and \$0.9 million in 2001.
- Between 2000 and 2001 employment within the forestry and logging sector, including support activities, was unchanged at 4,300.

- In 2001, total wages and salaries within fishing, agriculture, forestry and hunting fell 3.2% over 2000 to \$237.3 million.
- The total provincial harvest for 2001 was reported at 6.2 million cubic metres of solid wood, down 4.5% from 2000. Softwood species represented 85.6% or 5.3 million cubic metres of the total. On the production side, plywood and wood residue increased 4.5% to 4.4 million cubic metres, and lumber production declined 2.1% to 1.4 million cubic metres.
- Manufacturers' shipments for wood products in 2001 rose 1.9% over 2000 to \$481.0 million, and manufacturers' shipments of paper and allied products increased 0.8% to \$1,073.0 million.
- In 2001 price effect was the largest factor in the 12.9% decline in the value of international export lumber sales that fell to \$210.5 million. The value of wood pulp exports declined 8.9% to \$224.8 million. However, paper and paperboard exports increased 18.5% to \$639.8 million and other wood fabricated materials rose 3.8% to \$35.5 million.

- The lower dollar and exemption from the Canada-United States softwood 5-year agreement (which governed Canadian exporters from April 1, 1996 to March 31, 2001) had helped boost the U.S. demand for Nova Scotia lumber during the period of the agreement. Since the agreement came to a close, there have been negotiations between the United States and Canada concerning future U.S. tariffs. As most of its lumber comes from private wood lots, Atlantic Canada was exempt from an extra 18% countervailing duty imposed on the rest of the country by the US in 2001. A new 8.4% American anti-dumping tariff on Canadian softwood was imposed in May 2002. New U.S. duties have dealt a blow to the Canadian softwood lumber industry and Canada continues its attempt to have these rescinded.

## Fishing

103

### Commercial Fish Landings, Quantity and Value, Percentage Change, Nova Scotia, 1996–1997 to 2000–2001

Source: Department of Fisheries and Oceans Canada, *Statistical Services*  
[http://www.dfo-mpo.gc.ca/communic/statistics/stat\\_e.htm](http://www.dfo-mpo.gc.ca/communic/statistics/stat_e.htm)

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- There were 340,862 tonnes of fish landed in Nova Scotia during 2001 valued at \$752,820 million. Compared to 2000, this represented an 11.2% increase in the quantity and a 16.2% increase in value of landings.
  - Overall, the groundfish industry showed significant growth in 2001 as compared to 2000. The quantity of landed groundfish grew 13.1% while the value of landed groundfish increased by 11.3%. Within this sector, the landed value of hake and halibut experienced significant growth of 57.9% and 33.5%, respectively. These gains were offset by declines in the landed value of flatfishes (30.3%) and redfish (23.3%).
  - Harvest of pelagic and other finfish (herring, mackerel, tuna, etc) in 2001 rose 6.6% while its landed value grew 7.7% over 2000.
  - The shellfish sector saw significant expansion in shrimp and lobster fisheries. The landed quantity of shrimp increased 28.7% and the their value increased 16.3%. Lobster harvesting increased 26.1% and their landed value increased 27.4%. Overall, the shellfish sector was worth \$620.8 million in 2001, a 17.6% increase over 2000.
  - Nova Scotia fish exports, at \$1.1 billion, are the largest product group accounting for 19.9% of the value of all Nova Scotia exports in 2001. The value of fish exports increased 3.8% over 2000.
  - Aquaculture production is discussed in the "agriculture" section of this publication
- GDP in the fishing, hunting and trapping sector was \$237.0 million in 2001, up 3.9% from 2000.
  - Total capital expenditures in the province's fishing, hunting and trapping sector were \$53.4 million in 2001, a 3.1% increase over 2000. Revised investment intentions for 2002 indicate a further increase of 3.0% to \$55.0 million.
  - In 2001, employment of 5,800 in the primary activity of fishing, hunting and trapping displayed a decrease of 15.9% over 2000.
  - In 2001, wages and salaries within fishing, agriculture, forestry and hunting fell 3.2% over 2000 to \$237.3 million.

## Mining and Gas and Oil

107

### Mineral Production by Value, Nova Scotia, 1997–2001

\$millions

Source: Statistics Canada, *Canada's Mineral Production, Preliminary Estimates, 2001 Catalogue No. 26-202-XIB*

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- GDP in the mining and oil and gas extraction sector was \$359.2 million in 2001, up 19.4% from \$300.8 million the previous year.
- Capital investment in mining and oil and gas extraction decreased 3.2% to \$674.9 million in 2001 and is expected to increase 29.9% to \$877.0 million in 2002.
- In 2001 mining and oil and gas extraction employment declined 7.9% from 2000 to 3,500.
- Total wages and salaries in the mining and oil and gas extraction sector during 2001 fell 7.4% to \$132.9 million.
- The value of mineral production in 2001 increased 18.7% to \$1.4 billion primarily due to the production of natural gas and crude petroleum. In 2001, natural gas and natural gas by-products contributed \$972.1 million, or 68.7% of the mineral production total. A 53.8% increase in the value of crude petroleum contributed an additional \$150.7 million to total mineral production.
- Coal accounted for only 3.8% of the value of Nova Scotia's mineral production in 2001. Total coal production for 2001 was 1.1 million tonnes, valued at \$53.6 million, representing a decline of 7.2% in tonnage and 15.0% drop in value. This decline can be attributed to the closure of Prince Colliery in Cape Breton.
- The quantity of gypsum produced in 2001 declined 4.0% to 6.7 million tonnes and its value fell 6.5% to \$76.0 million. In 2001 Nova Scotia produced about 82.3% of all gypsum produced in Canada. Most of the gypsum is exported to the United States where the demand remains strong for wallboard production.
- The production value of structural materials (sand/gravel and stone), at \$63.6 million rose 1.2% from 2000, while the quantity of production up 0.3% to 11.0 million tonnes.
- There is strong interest in oil and gas exploration offshore Nova Scotia. As of January 1, 2002 there were 59 active exploration licences issued by the Canada Nova Scotia Offshore Petroleum Board. These exploration licences have been issued with exploration commitments totaling \$1.56 billion. Although exploration spending on these licences totaled more than \$500 million by September 12, 2002, in many instances the expenditures have been greater than the basic commitments. Based upon announced plans and remaining commitments, the Nova Scotia Department of Energy is forecasting expenditures on exploration will be in the \$1.5 billion range between the fourth quarter of 2002 and the end of 2006 when the initial 5 year licence period will have expired for all existing licences.
- As of December 31, 1999, natural gas from the Sable gas project began to flow through a gas pipeline to markets. In the third quarter of 2002, daily natural gas production averaged 550 MMcf/d from the Sable Project and was delivered to markets in Nova Scotia, New Brunswick and the United States. Natural gas liquids output per day is in the range of 20,000 barrels.

- In February 2000 PanCanadian (now EnCana) announced it has made a commercially viable gas discovery offshore Nova Scotia. Four wells were drilled under the original Panuke oil field. EnCana estimates commercially producible reserves at just under 1 tcf. In March 2002, EnCana filed its development plan for the Deep Panuke Project. It is expected to produce at an initial rate of 400 MMcf/d with start-up beginning in late 2005 or 2006.
- On August 16, 2002 Marathon and its partners announced they had discovered natural gas on their Annapolis Deep water block in 1700 metres of water south of Sable Island. An appraisal well and a second wildcat well on this block is being planned for 2003 to determine if the discovery is commercially viable.
- Other related activities in the mining industry have been the development of a quartz mine in Yarmouth County. Black Bull Resources Inc. has completed its exploration and environmental assessment and plans to bring the site into full production.
- In the Maitland area, another mining initiative is underway. Titanium Corp. is investing \$1.0 million to explore a newly discovered Hants County titanium deposit.
- Georgia Pacific has begun site preparation at its Medford, Inverness County quarry. First production is expected during fall 2002.
- MacLeod Resources has completed the environmental assessment on its red marble property near River Denys, Inverness County and is preparing stone for sale in specialty markets.

### Total Electricity Generation, Nova Scotia, 1997–2001

Source: Statistics Canada, *Electric Power Statistics*, Catalogue No. 57-001-XIB and *Electric Power Generating Transmission and Distribution*, Catalogue No. 57-202-XPB

***Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.***

- GDP in the utilities sector was \$551.0 million in 2001, up 1.5% from the previous year.
- In 2001 Nova Scotia's utilities industry reported an employment of 2,600, a decline of 200 people or -7.1% over 2000.
- Total wages and salaries showed an annual growth of 3.8% in Nova Scotia's utilities sector during 2001 reaching \$137.3 million.
- Electric power generation in 2001 increased 1.7% to 11,824,531 megawatt hours.
- Effective with fiscal 2002-2003 the Government of Nova Scotia created a new Department of Energy, a

direct result of implementation of recommendations of the government's strategy report "Creating Opportunity" (see: <http://www.gov.ns.ca/energystategy>). The new department will implement and manage provincial energy policies and brings together the energy responsibilities formerly held by the Petroleum Directorate and the Department of Natural Resources. Energy information with respect to oil and gas is available at: <http://www.gov.ns.ca/petro> and information on electricity, renewable energy resources, climate change, energy conservation and efficiency and consumer energy prices is located at: <http://www.gov.ns.ca/natr/energy>.

- Nova Scotia's first utility scale wind turbines will become operational in fall 2002. Electricity produced by the two 670 kW turbines, owned by Nova Scotia Power Inc., will be sold under a new green power rate structure application awaiting approval from the Utilities and Review Board. One turbine is located in Little Brook in Digby County and the other in Grand Etang near Cheticamp.
- Nova Scotia Power is in the final stages of selecting the successful proposal(s) for a private sector developer(s) to supply 100GWh of wind generated electricity.
- In mid-September 2002, the Province finalized Canada's first policy for leasing Crown land for wind energy generation.
- Emera's 2001 Annual Report provides further information about activities in Nova Scotia's energy sector. The Report can be accessed electronically at: <http://www.emera.com/investors/financialinformation/annualreport.html>

## Construction and Capital

115

### Capital Expenditures, Percentage Change, Canada and the Provinces, 2001–2002

% Change

Source: Statistics Canada, *Private and Public Investment in Canada*, based on preliminary actual 2001 and revised intention 2002 data, Catalogue No. 61-206

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001**

- Revised intentions of public and private investment in July 2002 indicate Nova Scotia total capital spending on plant, equipment and housing is expected to register the greatest increase of all the provinces and territories. Total expenditures of \$5.0 billion in 2002 represent a marked increase of 14.9% over 2001. This compared to a 5.6% increase anticipated in first intentions announced in February 2002. July's figures show anticipated growth at the national level of 3.0%. Among the provinces and territories, between 2001 and 2002, Nunavut is expected to experience the greatest decline of -14.1% in capital expenditures.
- Nova Scotia's housing investment alone is projected to rise 11.9% over a value of \$1,068.9 million in 2001 to \$1,196.3 million in 2002 as a result of new housing and renovations. Investment in the mining and oil and gas extraction sector is expected to increase 29.9% to \$877.0 million. The public administration sector is expected to invest \$692.9 million, an 85.5% increase over 2001. Real estate and rental and leasing services is anticipated to be up 43.6% to \$243.1 million and educational services is expected to invest \$173.2 million, a 33.3% increase in that sector over 2001.
- In 2001 Nova Scotia's GDP in the construction sector increased 3.7% over 2000 reaching \$1,114.2 million.
- During 2001 there were 25,700 people employed in construction in Nova Scotia displaying a 4.5% increase over the previous year and a 20.7% increase over the 1997 employment level.
- Total wages and salaries in the province's construction sector reached \$864.9 million in 2001, up 6.7% over 2000.
- The value of building permits in the province during 2001 fell 20.3% from 2000 to \$699.9 million. All sectors—institutional & government, commercial, residential and industrial contributed to this decline with a loss in construction value of \$73.1 million, \$47.4 million, \$37.6 million and \$20.4 million respectively.
- During 2001, 4,092 dwellings units were started in Nova Scotia, down 7.7% over 2000.

Note: The "Nova Scotia Construction Activity Report", Statistics Division, Nova Scotia Department of Finance is a resource that monitors much of the province's major construction activity. The publication is produced three times a year—in February, July and November). Further information and an order form are available at: <http://www.gov.ns.ca/finance/publications/publications.html>

## Manufacturing

122

### Value of Manufacturing Shipments, Nova Scotia, 1997–2001

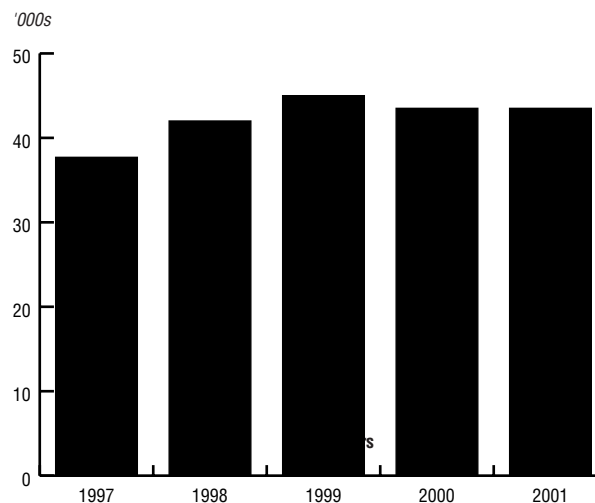

Source: Statistics Canada, *Monthly Survey of Manufacturing*, Catalogue No. 31-001-XPB

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- In 2001 GDP in the manufacturing sector increased 1.3% to \$2,363.8 million. The manufacturing sector represented 11.4% of total GDP in the province in 2001.
- Total capital expenditure in 2001 fell 15.9% to \$328.9 million; however, it is expected to increase 15.4% to \$379.4 million in 2002.
- In 2001 employment in Nova Scotia's manufacturing sector was unchanged from 2000 at 43,500. Employment in this sector accounted for 10.3% of total provincial employment.
- Total wages and salaries in manufacturing industries in 2001 rose 4.3% over 2000 levels, reaching \$1,298.1 million. This sector accounted for 10.9% of the province's total wages and salaries during 2001.

- Manufacturing shipments continued their upward trend in 2001. The value of shipments in 2001 reached \$8.5 billion, a 0.6% increase over 2000. This represented a 34.4% increase in the value of Nova Scotia's manufacturing shipments from 1997.
- Shipments by the food industries totaled \$2.2 billion in 2001 or 25.6% of the total manufacturing sector. This was 28.5% more than the value of food industry shipments for 1997.
- Of all manufacturing shipments in 2001, 12.6% were paper products. Total value of these shipments increased 0.8% from 2000 to \$1.1 billion in 2001.
- Plastics and rubber products, which represented 12.5% of all shipments, rose 3.6% over 2000 to \$1,067 million.
- In 1999 there were 634 manufacturing establishments in Nova Scotia. Of these, 76.2% employed less than 50 people while 10.7% employed between 50 and 99 people; 6.9% employed between 100 and 199 people and 6.2% employed 200 or more employees.

## Trade

126

### Percentage Growth Rates, Exports by Major Destination and Total Imports, Nova Scotia, 1997-1998 to 2000-2001

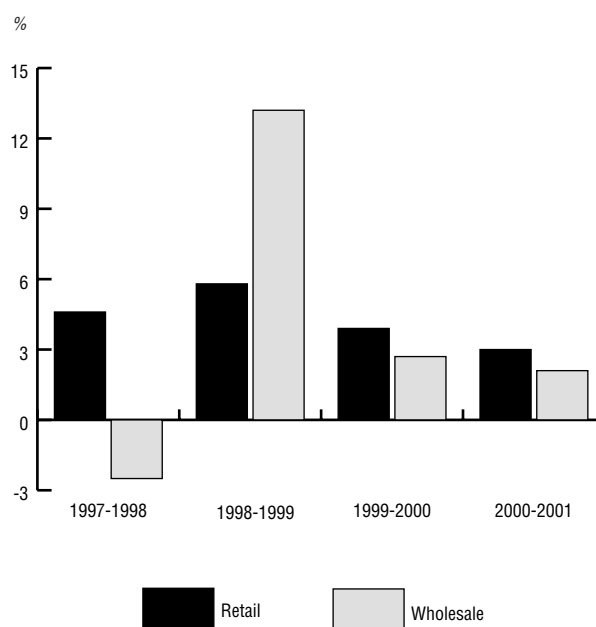

*Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.*

- GDP in the trade sector increased 1.5% in 2001 over 2000 to \$2,494.1 million. The wholesale portion, at \$1,108.5 million, was up 2.1% over 2000 while retail, at \$1,385.6 million, rose 1.0%. Overall, the trade sector made up 12.0% of the province's total GDP.
- Capital expenditures in retail trade declined 12.8% from 2000 to \$94.1 million in 2001. Investment intentions for 2002 are projected to reach \$102.1 million, an increase of 8.5%. In wholesale trade, while capital expenditures fell 35.1% to \$115.7 million in 2001, year 2002 is expected to show a further decline of 3.4% to \$111.8 million.

- Employment in the trade sector increased 2.1% over 2000 to 77,000 (63,200 in retail sector and 13,800 working in wholesale sector). The trade sector employment represented 18.2% of all employment in Nova Scotia during the year.
- In 2001 wages and salaries in the trade sector rose 0.5% to \$1,644.0 million. This represented 13.8% of total wages and salaries in the province in 2001.

### Retail and Wholesale Trade, Annual Percentage Change, Nova Scotia, 1997-2001

Source: Statistics Canada, Retail Trade, Catalogue No. 63-005-XPB and Wholesale Trade, Catalogue No. 63-008-XIB

- Nova Scotia reported \$8,742.7 million in retail sales during 2001, a 3.0% increase over 2000. Supermarkets and grocery stores represented 25.5% of retail trade and motor vehicle and recreational vehicle dealers trade accounted for 23.7% of the total.
- In 2001 Nova Scotia's wholesale trade increased 2.1% to \$6,996.2 million. Canada's total wholesale trade, at \$394,167.8 million, rose 2.5% over 2000.

- Total exports from the province reached \$5,681.6 million in 2001, an increase of 10.7% over 2000. This was impacted in large part by a 12.3% increase in exports to the United States. In particular, exports to the New England region increased 34.0% to \$2,305.7 million and exports to the West South Central region nearly doubled to \$160.0 million. In 2001, 27.0% of exports were classified as inedible fabricated materials and 22.4% were food, feed and beverages.
- Nearly 60% of Nova Scotia's \$5,501.8 million in imports during 2001 were classified as inedible end products. Imports experienced a 1.3% increase over 2000.

**Note:**

While Nova Scotia does not have very good direct international trade connections by road, 40.9% of Nova Scotia exports clear Canada by road. The Yarmouth Ferry is Nova Scotia's only road link. Most Nova Scotia exports (road) clear Canada from New Brunswick (67.9%) and Ontario (29.1%). Nova Scotia does not have any direct rail connections to international markets. Nova Scotia export (rail) exit Canada from Quebec (35.4%) and Ontario (60.8%).

Nova Scotia has excellent water connections to international markets. Nova Scotia exports (water) exit Canada from Nova Scotia ports (77.6%) and British Columbia (12.4%).

Nova Scotia has air connections to international markets. Nova Scotia exports clear Canada from Nova Scotia airports (78.8%), Quebec (9.4%) and Ontario (9.4%).

Nova Scotia natural gas is exported to the United States via pipeline. The gas clears Canada from New Brunswick. This accounts for 93.2% of Nova Scotia exports (other).

## Transportation

135

### Total Water-Borne Cargo, Tonnage, Halifax Port Authority, 1997–2001

Tonnage ('000)

Source: Halifax Port Authority

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- Overall GDP in the transportation and warehousing sector in 2001 was \$895.0 million, showing a downward movement of 4.0% over 2000. Within the sector, the GDP in truck transportation at \$216.8 million was down 6.2%, pipeline transportation at \$29.4 million increased 27.3% and warehousing and storage at \$12.3 million declined 3.9% from 2000.
- Total capital expenditures in transportation and warehousing industries for Nova Scotia declined 6.8% from 2000 to \$220.2 million in 2001. Investment intentions for 2002 indicate a further decline of 11.7% to \$194.4 million.
- In 2001 overall employment in the transportation and warehousing industry rose 2.9% over 2000 to 21,200. This number was 26.9% higher than in 1997.
- In 2001 total wages and salaries in the transportation and storage sector were up 2.9% over 2000 to reach \$644.7 million and accounted for 5.4% of the province's total wages and salaries.

#### Road

- There are approximately 23,000 kilometers of highways in Nova Scotia. The Trans Canada and 100-series highways are all-weather, mostly controlled-access and rapid transit that join with the New Brunswick Trans Canada Highway to points in Canada and the United States. Highway 104 includes a stretch of four-lane toll highway. During fiscal year 2002-03, the Province of Nova Scotia has budgeted \$85.5 million in capital highway spending. This is approximately 60% more than last year's investment and almost triple the amount spent 1999-2000. Some of this year's major improvements to roads, highways, bridges and ferries include the following major capital projects:
  - Highway 101 Twinning from Mount Uniacke to Ellershouse (21 kilometres, \$27 million)
  - Highway 103 Twinning from Otter Lake to Upper Tantallon (work begun in 2002 is expected to be carried out in phases with an autumn 2005 completion, 15 kilometres, \$16 million)
  - Highway 103 Barrington Bypass (8.3 kilometres plus an interchange and an intersection, \$12.1 million over three years)
  - Truck 7 Corridor (announced July 2002, 61 kilometres of highway improvements, \$14.8 million and \$2.5 million in structural improvements, to be completed over the next five years)
  - Seal Island Bridge (Phase 1 started September 2001, Phase 2 construction began in May 2002 and will be completed in fall 2002)
  - Margaree Harbour Bridge (construction start in summer 2002 for December 2003 opening, \$9.8 million)

- Acadian Lines provides public passenger service seven days a week to most major communities in the province and also offers parcel express and charter service. Other regional, local and charter companies operate ground transportation throughout the province.
- In 2001 truck transport industries' GDP fell 6.2% from 2000 to \$216.8 million and accounted for 24.2% of the GDP of the transportation and warehousing sector. Employment in 2001 reached 6,100 persons, an increase of 3.4% over 2000. Average weekly wages in the truck transport sector were \$598.12, an increase of 2.4% over 2000
- Halifax is a port of call to over 16 cruise lines. In 2001 the number of cruise ship calls increased 3.2% over 2000 to 96 calls. The number of cruise ship passengers increased in 2001 by 15.8% to 160,237 people.
- In December 2000, the Halifax Port Authority announced a \$59 million capital expansion including numerous improvements including:
  - Dredging the container berths at both container terminals to accommodate post Panamax ships
  - The purchase of land for future development of the Port
  - The upgrading and reconstruction of existing Port terminals
  - The development of new rail trackage on terminals
- Car/passenger ferry service connects between Bar Harbor and Portland, Maine to Yarmouth, Nova Scotia; Port-aux-Basques and Argentia, Newfoundland to North Sydney, Nova Scotia; Saint John, New Brunswick to Digby, Nova Scotia; and Wood Islands, Prince Edward Island and Caribou, Pictou County, Nova Scotia.

#### **Water**

- Water transportation industries employment rose by 33.3% in 2001 to 1,200 persons.
- Numerous ports dot the coastline of the province. The Port of Halifax, a key international gateway, is one of the world's finest and most sophisticated deep-water ports and is perfectly suited to 21st century sea-going trade and commerce. Handling about 14 million tonnes of cargo in 2001, the Port of Halifax is the most easterly North American full-service port. As such, it is the closest east coast port to Europe and is the first destination for carriers sailing from Asia through the Suez Canal. It offers a 21 metre-deep ice free harbour with easy approaches. Facilities at the Port include two container terminals, a ro/ro facility, a gypsum terminal, oil docks, tallow tanks, a grain elevator and multi-purpose facilities. Shippers have access to over 135,000 square meters of open area and shed space. Almost all piers have on-dock rail service as well. Feeder services are available to Newfoundland, Boston, Portland and St. Pierre and Miquelon, highways connect to all inland points in Canada and the United States and through the Halifax International Airport, direct and connecting air freight and passenger service provide connections to all national and international destinations. The Halifax Port Authority is responsible for the administration of Halifax Harbour activities. (Halifax Port Authority - <http://www.portofhalifax.ca>)

#### **Rail**

- CN is a federally regulated railway and operates the primary inland rail connection linking Halifax, regional and international shippers, to markets throughout Canada and the United States. In addition, CN offers access to an extensive inter-modal service through its Halifax Richmond Terminal and service to the two container terminals. The Sydney Coal Railway, also federally regulated, is owned by Emera and operates the former Devco railway between Sydney and Langan.
- There are two shortline railways under provincial jurisdiction providing service to regional and local shippers. The Cape Breton & Central Nova Scotia Railway (CBNS) operates between Sydney and Truro, interchanging with CN in Truro. The Windsor & Hantsport Railway (WHRC) operates between New Minas and Windsor Junction, connecting with CN in Windsor Junction. The WHRC operates a one day a week passenger excursion train on Sundays.

- VIA operates a six-day a week transcontinental passenger rail service between Halifax and Montreal with stations in Halifax and Truro. VIA also operates a passenger excursion train called the Bras d'Or between Halifax and Sydney over CN and CBNS railway lines.
- In 2001, employment in the rail sector was 600 persons, down from 900 in 2000.

#### **Air**

- Employment in the air transportation sector was 3,100 in 2001; up 34.8% from 2000.
- Halifax International Airport is the aviation hub for Atlantic Canada. Services operating out of the Halifax International Airport, offer regular flights to all Canadian destinations as well as international service to Boston, New York (Newark), Bermuda, London, Glasgow and points beyond. Major airports with service connecting to key Atlantic Canadian destinations are also located in Yarmouth and Sydney. Numerous smaller facilities are located throughout the province to serve private craft and flying clubs.
- The operational, managerial and developmental control of the Halifax International Airport resides with the Halifax International Airport Authority (HIAA). Their \$100 million Airport Improvement Program is part of a two-year plan. Part of the funding for the Airport Improvement Program is being generated through an Airport Improvement Fee (AIF), a charge of \$10 included in a departing passenger's ticket price. As part of this program, the international arrivals area opened in August 2001 and the domestic arrivals area was completed in Spring 2002. The completion of a new \$5.7 million water treatment facility in 2002 will replace an existing lime treatment plant. The main lobby and retail expansion (phase two of the \$100 million airport improvement strategy) was also completed in Spring 2002. Main lobby remodeling is now underway with an early 2003 completion date.
- It was announced in July 2002 that helicopter company CHC Helicopters will be leasing one of 12 airside lots, being developed in the new airside subdivision, to construct a \$3.7 million office/hanger facility.
- As stated by the Halifax International Airport Authority, the Halifax Airport has been one of Canada's fastest growing airports, increasing its passenger volume from 2.3 million passengers in 1995 to almost 3.0 million passengers in 2001. The airport spins off total economic benefits of over \$1.5 billion: \$337.5 million in direct benefits, \$697.7 million in indirect benefits, \$56.0 million in construction benefits and \$450 million in air tourism benefits.<sup>(1)</sup>
- In summer 2002 a new cargo facility was in the planning stages at Yarmouth Airport.
- A \$1 million upgrade to Sydney Airport's baggage and waiting area was announced in spring 2002.

## Information and Cultural Industries

143

### Internet Use, Percentage of Households, Canada, Nova Scotia and Halifax, 2001

% of Households

Source: Statistics Canada, CANSIM Table 358-002

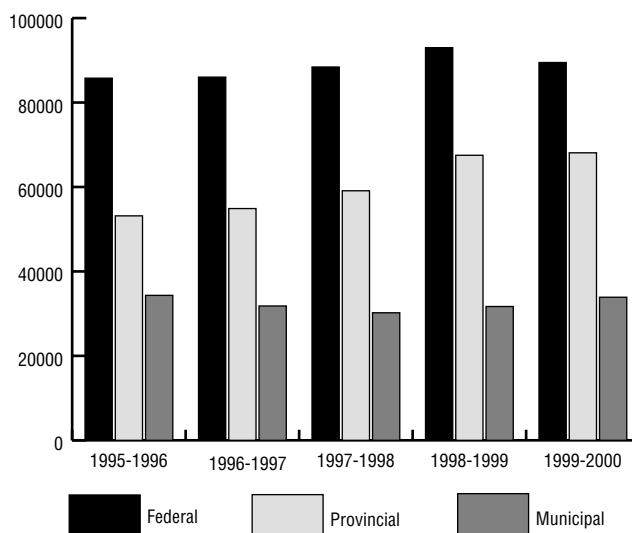

*Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.*

- GDP in the information and cultural industries sector increased 10.2% in 2001 over 2000 to \$1068.4 million and was 51.9% over 1997. The sector comprised 5.1% of the province's total GDP in 2001.
- Capital expenditures in information and cultural industries rose 11.8% from 2000 to \$346.7 million in 2001. Investment intentions for 2002 are projected at \$307.0 million, a decline of 11.5%.
- Employment in the information, culture and recreation sector during 2001 increased 6.0% over 2000 to 17,700.
- In 2001 wages and salaries in the information and cultural industries sector experienced a strong annual growth of 12.5% to \$372.8 million.
- An increasing connectedness to the Internet seems to be an indispensable means to developing our growing knowledge-based economy. Just five years ago, 29.0%

of households in Canada and 31.8% of households in Nova Scotia were using the Internet (from any location—home, workplace, school, public library or other). In 2001 these figures approximately doubled increasing to 60.2% and 57.4% of households in Canada and Nova Scotia respectively. The more dramatic increase has been in use of the internet from home, where usage has increased from 16.0% of Canadian households in 1997 to 48.7% of households in 2001. In Nova Scotia this usage rose from 14.3% of households in 1997 up to 43.3% of households in 2001.

- The development in such areas as Nova Scotia's arts, crafts, theatres, museums, recordings, videos, books, radio and television programs broadens and deepens knowledge and understanding of the province's culture, as well as, provides a source of income for Nova Scotia artists and businesses. The significance of culture as a growing industry and contributor to the economy is seen in the commitment made by all levels of government where, in 1999-2000 alone, expenditures to culture totaled \$191.5 million, an increase of 10.5% over five years earlier.

### Total Government Expenditures on Culture, by Level of Government, Nova Scotia, 1995-1996 to 1999-2000

(1) Municipal spending is on a calendar year basis.

<sup>(1)</sup> The Canadian Broadcasting Corporation (CBC) distributes its program costs according to the province where the production activities occur. Station transmission costs are related to the geographic location of the transmitter. The CBC's network distribution costs follow the principle used for station transmission costs, except for terrestrial lines and satellite channels which are paid by Ottawa but transferred to Toronto and Montreal Network Centres. Payments to private station affiliates are charged to the responsible Network Centres and relate also to the province where these centres are located. The Corporation's administration costs are distributed according to the province where the administration function is located geographically. The CBC distributes its capital expenditures according to the provincial location of capital assets.

## Finance, Insurance and Real Estate

155

### Average Residential House Selling Price, by Region, Nova Scotia, 2001

Source: Nova Scotia Association of Realtors

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- Continued low interest rates had a positive influence on the finance, insurance, real estate, renting and leasing sector. GDP in the sector at \$4,516.1 million increased 3.3% in 2001 over 2000. The sector represented 21.7% of the province's total GDP.
- Capital investment in finance and insurance during 2001 was down 42.5% over 2000 to \$202.3 million but is expected to increase to \$202.9 million in 2002. The real estate, rental and leasing sector recorded expenditures of \$169.3 million in 2001, down 6.2% from 2000 and is anticipated to increase its investment by 43.6% to \$243.1 million in 2002.
- Technological advancement and consolidation in the sector have led to a reduction in overall employment in finance, insurance, real estate and leasing industries. Total employment fell 9.5% to 20,100 in 2001. There were 14,900 employed in finance and insurance industries in Nova Scotia, down 0.7% from 2000. There were a further 5,300 employed in real estate and leasing industries, a decrease of 26.4% over 2000.
- Wages and salaries within the province's finance, real estate and company management industries totaled \$899.2 million in 2001, up 5.2% over 2000.
- In 4th quarter 2001 the long-term corporate bond yield had declined to 6.95% as compared to 7.10% in the same quarter a year earlier. Between 4th quarter 2000 and 4th quarter 2001 the chartered banks prime rate fell from 7.50% to 4.17%. Also during this period, the five-year conventional mortgage rate fell from 8.15% to 6.87%.
- The value of insurance premiums in Nova Scotia during 2001 reached \$1,231.2 million, an increase of 10.2% over 2000. Of total premiums, auto, as well as, accident and sickness premiums constituted 31.8% and 22.7% respectively.
- Residential MLS sales in Nova Scotia rose 15.5% over 2000 to 9,735 units in 2001. The total value of sales increased 22.4% to \$1,137 million. Of all units sold in the province, 68.3% were listed in the Halifax-Dartmouth region where sales experienced an 18.4% increase over 2000. The average MLS house price in 2001 was \$116,831, up 6.0% over the previous year.
- Between 2000 and 2001 office vacancy rates increased 6.2 percentage points to 11.3% in the Halifax suburban area, 5.5 percentage points to 10.6% in Bedford-Sackville, 0.9 percentage points to 13.9% in Dartmouth area and 0.3 percentage points to 6.4% in downtown Halifax. The vacancy rate for industrial space declined 1.2 percentage points to 5.9%.
- Canada Mortgage and Housing Corporation's (CMHC) Rental Market Survey is conducted every October in cities and large urban areas across Canada. The November 2001 report placed the rental market vacancy rate in Metro Halifax at 2.8%, down from 3.6% in 2000. Over the past year, average rent for all units in Metro Halifax increased 4.0% from \$606 to \$630. The total rental market increased by over 500 new units in Halifax Metro over the previous year to slightly less than 36,000 units in October. Vacant units declined by more than 250 to 1,008.
- Over the past year in Cape Breton RGM, Truro CA and Kentville CA declines were evident in average vacancy rates, 11.1%, 3.1% and 2.5% respectively. New Glasgow CA reported a slight increase to 5.6%. Average rents for a three or more bedroom apartment range from \$541 in New Glasgow area to \$816 in Kentville area.

## Business

164

### Percentage Change in Number Business Bankruptcies, 1996–1997 to 2000–2001

Source: Industry Canada, Office of the Superintendent of Bankruptcy

*Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.*

- The concept of a private-sector-led organization to direct Nova Scotia's business development efforts was introduced in the fall of 2000 with the release of the province's economic growth strategy, "Opportunities for Prosperity"<sup>(1)</sup>. Out of this strategy emerged Nova Scotia Business Inc. (NSBI), a provincial Crown corporation, which was created in April 2001. Its goal is to expand business activity in the province through business attraction, business retention and expansion, trade promotion and lending and financing
- A merger between the Department of Economic Development and the Nova Scotia Technology and Science Secretariat in 2001 combined them as the new Office of Economic Development. Its focus is in the development of public policy especially as it relates to promoting the best environment for businesses to start and expand in the digital economy. (see <http://www.gov.ns.ca/econ/business.asp>)

- The Nova Scotia Business Climate Index is an approach that was adapted for the province by CanMac Economics Limited. The Index monitors and compares the Nova Scotia business climate nationally and in Atlantic Canada using comparable measures.<sup>(2)</sup>
- According to a Statistics Canada database that tracks all businesses that issue T4 slips, the number of businesses in Nova Scotia that employ people grew from 31,709 in 1992 to 33,138 in 1999. Small businesses, those employing less than 50 employees, accounted for 92.1% and large businesses, those employing 50 or more employees, accounted for 7.9% of all businesses. Of the total 367,200 employees of businesses in 1999, 29.8% worked within small business and 70.2% were in large business. Approximately 75% of the \$10,970 million in payrolls in 1999 were derived from Nova Scotia's large businesses sector.
- During the 2001-02 period, there were 9,507 new company registrations in the province or 9.3% fewer than the previous year. Just over half of the new registrations were partnership and business name registrations.
- Statistics for 2001 indicate a 14.5% increase over 2000 in the number of business bankruptcies in Nova Scotia. Almost half of the bankruptcies in 2001 were in retail, construction, and accommodation, food & beverage service industries (17.1%, 15.4% and 13.9% respectively). Liabilities associated with the year's bankruptcies rose 10.6% to \$64.3 million.

Note: The major source of updates for the Business Register is from Revenue Canada's Taxation Payroll Deduction Account File. These employer accounts represent the universe of business entities having paid employees in Canada. Therefore, the Business Register does not include all industrial activity in Canada, but is limited to the "employer" portion of the business world. Thus an activity such as a corner store that is owner-operated, with no paid employees, would be excluded from this employer-based file.

## Educational Services

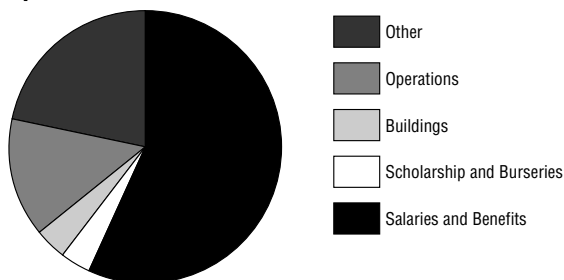

171

### University Revenue and Expenditure Sources, Nova Scotia, 2000–2001

#### Revenues

#### Expenditures

*Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.*

- The education sector of the economy is composed of both public and private components. The Department of Education has a broad mandate that includes responsibility for education and training from grade primary through to all post-secondary and adult learning destinations. These destinations include university, community college, private career colleges, adult education, apprenticeship and other aspects of human resource development. Other responsibilities include public libraries, provincial immigration matters and the Youth Secretariat.
- In 2001 GDP in the educational services sector increased 0.6% over 2000 to \$1,159.5 million. The sector represented 5.6% of total GDP in the province in 2001.<sup>(1)</sup>
- Total capital expenditure in education services during 2001 rose 29.9% over 2000 to \$129.9 million and is expected to increase a further 33.3% to \$173.2 million in 2002.<sup>(2)</sup>
- In 2001 employment in Nova Scotia's educational services sector increased 2.5% over 2000 to 33,100. Employment in the sector accounted for 7.8% of total provincial employment.<sup>(3)</sup>
- Total wages and salaries in educational services industries in 2001 rose 1.3% over 2000 levels, reaching \$1,1090.6 million. This sector accounted for 9.1% of the province's total wages and salaries during 2001.
- In 2001-02, the net budget of the Department was \$888,437,000. In addition the budget for Assistance to Universities was \$201,232,000.<sup>(4)</sup>
- An important focus of the Department's activities is to enable Nova Scotians to develop their potential through acquisition of the knowledge, skills and attitudes needed to become lifelong learners who can identify and solve problems; deal effectively with change; work collaboratively with others; communicate clearly, competently and confidently; and make thoughtful and responsible decisions. Such learners are enabled to participate in a healthy, democratic society, and in a lifetime of meaningful work which supports a prosperous, sustainable economy.
- To recognize the importance of strong coordination of skill development activities, the Department of Education has been identified as the lead agency to deliver a comprehensive labour market strategy. The Department will work with business, labour and educational institutions to improve the skill level of the existing Nova Scotia workforce and develop the appropriate skill sets for new entrants to Nova Scotia workplaces.
- The implementation of the Youth Pathways and Transitions strategy will continue in 2002-03. As well The Information Economy Initiative to support teaching and learning in grades 4-6 through the use of technology will continue. This initiative includes the provision of computers, software, professional development, and technical support.
- The Department will continue with the implementation of the Code of Conduct, which covers all school members.

- Literacy continues to be a priority. The Department's Active Young Readers/Jeunes lecteurs actifs initiative will continue to provide support for the literacy development of students in grades primary-6 and be expanded to provide increased support for grade 7 students. A literacy strategy will be developed for Acadian students beginning at the grade 4 level and extending to grade 7.
- Mathematics continues to be a priority area. The Department will assist school boards in strengthening their elementary and junior high mathematics programs through the provision of workshops for lead teachers and school principals in each region.
- As the lead agency responsible to deliver a comprehensive labour market strategy, the Department of Education will work with business, labour and educational institutions to improve the skill level of the existing Nova Scotia workforce and develop the appropriate skills sets for new entrants to Nova Scotia workplaces.
- The Department will continue to collaborate with partners on intergovernmental projects including the Physically Active Children and Youth (PACY) Strategy, the Tobacco Strategy, Youth Mental Strategy, Youth Sexual Health Strategy, Healthy Eating Strategy, and Chronic Disease Strategy.
- The Department will continue to work toward the establishment of an Africentric Learning Institute and implementation of other key recommendations of the Black Learners Advisory Committee (BLAC) Report on Education.
- The Department will work with the Nova Scotia Community College (NSCC) on their growth strategy.
- The Department will continue to implement the Nova Scotia School for Adult Learning (NSSAL) to administer and coordinate, through partnerships, a system of programs that will create a clear pathway for adults seeking a high school graduation diploma.
- Nova Scotia's public libraries are expanding their efforts to readily provide consumer health and wellness information across the province. The Adopt-a-Library Literacy program, in partnership with the RCMP and local police agencies, will be expanded to a province-wide program as a pro-active crime prevention initiative. The regional libraries' Summer Reading Program will be expanded to include reading/writing camps for children.
- The delivery of student assistance in Nova Scotia is undergoing substantial examination. Issues such as the provision of enhanced student debt relief, new partnerships with financial institutions, regionalization of some services and a new designation policy for institutions are being considered.
- The Employability Assistance for People with Disabilities (EAPD) initiative will develop transition to employment programs for Nova Scotians with disabilities involved in post-secondary training.

<sup>(1)</sup> Using the most current enrollment data available, average tuition fees have been weighted by the number of students enrolled by institution and field of study. Fees at both public and private institutions are included in the weighted average calculations.

<sup>(2)</sup> Both in and out-of-province students are included in the weighted average calculations.

<sup>(3)</sup> Using the most current enrollment data available, average additional compulsory fees have been weighted by the number of students per institution. Fees at both public and private institutions are included in the weighted average calculations.

## Health Care and Social Assistance

179

### Health Care Services, Total Health Expenditure<sup>(1)</sup>, Nova Scotia, 12 Month Periods ended March 31, 1998 to March 31, 2002

<sup>(1)</sup> Total health expenditures represents total expenditures (including capital expenditures) less recoveries.

Source: Nova Scotia Department of Health

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

- In 2001 GDP in the health services and social assistance sector of Nova Scotia increased 0.5% over 2000 to \$1,571.5 million. The sector represented 7.6% of total GDP in the province in 2001.
- Nova Scotia's total capital expenditure in health care and social assistance in 2001 rose 134.9% over 2000 to \$111.1 million; however, it is expected to decline 25.2% to \$83.1 million in 2002.
- In 2001 employment in Nova Scotia's health care and social assistance sector declined by 600 persons to 50,200. Employment in the sector accounted for 11.9% of total provincial employment in 2001.
- Total wages and salaries in health care and social assistance industries within Nova Scotia in 2001 rose 7.4% over 2000 levels, reaching \$1,307.8 million. This sector accounted for 10.9% of the province's total wages and salaries during 2001.
- In February 2002, the Nova Scotia Department of Health announced that it would increase funding to District Health Authorities by \$88 million.
- The Department announced in April 2002 that, in an effort to protect Nova Scotians, especially children and youth, from the dangers of second-hand smoke, smoking would be banned in several public places including malls, taxis and recreational facilities.
- In June 2002, the Department allocated funds received from the federal government's program to assist provinces and territories with the purchase of new or replacement medical equipment. These funds were used for, among other things, the purchase of new MRI equipment for the Cape Breton District Health Authority.
- The Nova Scotia Department of Health announced in June 2002 that it was accepting all 12 recommendations of the Provincial Osteoporosis Committee, including placing new bone density units in Sydney and Yarmouth and operating the Truro unit at full capacity.
- In July 2002, the Nova Scotia Health Research Foundation announced nearly \$5 million in funding to over 50 health researchers.
- Reporting to Nova Scotians on Comparable Health and Health System Indicators was released in September 2002 to fulfill the First Ministers' mandate for all Canadian jurisdictions to report to their own citizens on health system performance using a common set of comparable indicators.

- During the 2001-02 fiscal year, 50 more portable child care subsidized spaces were made available for families across Nova Scotia. Portable subsidized child care spaces are assigned to the child and not to the child care centres. The space and the subsidy follow the child if the family has to move within the province. This continues the government's commitment to provide more child care choices for families. Five of the fifty spaces announced were reserved for children with special needs. This brought the number of portable subsidies to ninety-five.
- Nova Scotia Department of Community Services provided 2,460 subsidizes for child care in 2001-02. As of March 2002 there were 362 licensed child care centres providing a total of 6,799 full day child care spaces and 3,341 part-day spaces for children.
- Child Care Stabilization Grants were issued to 195 full-day child care sector applicants during 2001-02 for a total of \$3.4 million. The purpose of the grants is to assist in attracting and retaining quality child care staff.
- In September 2001 construction began to build a \$ 3.4 million secure care treatment facility for children and youth, to be completed in late 2002. The Departments of Justice and Community Services, in consultation with child welfare officials, have begun the program design for the facility. The new facility will be mandated under the Children and Family Services Act to provide a safe, locked, crisis and stabilization placement for young people who are in care of child welfare authorities due to abuse and/or neglect.
- A report released in October 2002, *The Cost of Chronic Disease in Nova Scotia*, was written by GPI Atlantic and funded by the Department of Health, through Dalhousie University's Population Health and Disease Prevention Unit and Health Canada's Population and Public Health Branch. It looked at the economic impact of seven chronic illnesses: cardiovascular disease, cancer, respiratory ailments, diabetes, muscular skeletal disease, such as arthritis, diseases of the nervous system and sense organs like Parkinson's or blindness and mental illness. The Report notes that although Nova Scotians live as long as most Canadians, they become sick from chronic diseases earlier. The result is \$1.24 billion in direct medical costs and \$1.79 billion in lost productivity each year. (see: [http://www.gov.ns.ca/health/reports.htm#chronic\\_disease](http://www.gov.ns.ca/health/reports.htm#chronic_disease))

### Percentage of Tourism Receipts by Expenditure Type, Nova Scotia, 2001

Note: Transportation includes taxi and vehicle rental and automobile and fuel; food includes groceries and liquor and restaurants; accommodation includes fixed roof accommodations and campgrounds.

Source: Nova Scotia Department of Tourism and Culture, *Enquiry and Research Services Section*

**Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.**

#### Tourism

- Nova Scotia's beautiful landscape, diverse cultures and rich heritage add tremendous value to our quality of life. The province offers hundreds of places of stay while partaking of festivals, events and attractions throughout the province.
- During 2001 the tourism industry generated \$1.2 billion in direct revenues. This represents a 2.3% decrease from the 2000 level.
- Approximately 56% of the 2,143,700 visitors to Nova Scotia originated from Atlantic Canada, 18% were from Ontario and 14% came from the United States. Approximately 22% of all tourists visiting the province in 2001 traveled by air.

- The largest expenditures by tourists as a percentage of total revenues were for transportation (35%), restaurants (23%), fixed roof accommodation (22%) and shopping (10%).
- Tourist spending was highest in the Halifax-Dartmouth area at 46% of total revenues, followed by Cape Breton (18%), Annapolis Valley (14%), South Shore (8%), Fundy Shore (6%), Northumberland Shore (6%) and Eastern Shore (2%).
- Cultural workers in Nova Scotia numbered 8,880 in 1997. This represented 2.3% of the employed workforce, slightly below the 2.6% rate seen at the national level in that year.

#### Other Business Service

- Engineering services in Nova Scotia showed total revenues of \$168.2 million in 2000, up 29.2% over 1997. Total expenses increased 39.2% over 1997 and there was a 44.6% increase in salaries, wages and benefits during the same period. While growth in Nova Scotia's engineering services between 1997 and 2000 was more pronounced than for Canada as a whole, the industry's profit margin dropped 6.8 percentage points to 4.3% in the province as compared to a 0.9 percentage decline to 9.4% at the Canada level.
- In 2000 there were 519 computer systems design and related service firms in Nova Scotia, 24.8% more than in 1999. Employment in these firms between 1999 and 2000 rose 78.0% to 1,778 persons in 2000. Although the number of software publishers fell 35.5% between 1999 and 2000 to 20 firms, the employment in these businesses increased 24.7% in this period to 444 in 2000.
- The environment industry is composed of businesses that produce goods and services that are used or can be used to measure, prevent, limit or correct environmental damage to water, air and soil as well as problems related to waste, noise and ecosystems. The industry also produces "eco-efficient" technologies that decrease material inputs, recover valuable by-products and reduce energy consumption.<sup>(1)</sup>

- The 365 businesses comprising Nova Scotia's environment industry derived \$323 million from the sales of environmental products in 2000, or 53.9% of their total revenues. Nova Scotia reported 2.3% of total Canadian environmental products revenues. Three product categories accounted for this total, namely, environmental services and environmental goods categories accounted for 54.8% and 32.2%, respectively, while environment-related construction services accounted for the remaining 12.7%.
- Demands for call center staff in the province has created demand for more trained technical personnel and support through the Nova Scotia Community College. In 2002, about 30 companies across the province were providing inbound and/or outbound call center service. The latest announced arrivals to the business include Xerox and Service Zone. The Xerox call center facility in Burnside opening in September 2002 is expected to reach 800 staff once the operation is in full operation. United States firm Service Zone plans to create 400 jobs by the end of 2002 in a call center facility at Cornwallis. Service Zone also expects to establish a second location in Liverpool by 2003 initially generating about 200 jobs.

## Public Administration

198

*Refer to page (i) of the introductory section of this publication for an important notice about sector data, including information about the November 8, 2002 release date for revisions to Statistics Canada's GDP by industry for the period 1997-2001.*

- Public administration comprises establishments primarily engaged in activities of a government nature, e.g., the enactment and judicial interpretation of laws and their pursuant regulations, and the administration of programs based on them. Legislative activities, taxation, national defence, public order and safety, immigration services, foreign affairs and international assistance, and the administration of government programs are activities that are purely governmental in nature.<sup>(1)</sup>
- Health care and social assistance, as well as, educational services are each addressed in further detail in separate sections within this publication.
- Total GDP for the public administration sector in Nova Scotia was \$2,095.3 million in 2001, a 1.3% increase over 2000. Public administration contributed 10.1% to Nova Scotia's total GDP in 2001.
- During 2001, capital investment in public administration in Nova Scotia was \$373.6 million, a 27.7% increase over 2000. Investment intentions show a significant increase in capital expenditures in public administration is expected in 2002, up 85.5% from 2001 to \$692.9 million in 2002.
- In 2001, employment in public administration was 25,900, up 2.0% over 2000. This figure is based on Statistics Canada's Labour Force Survey that represents civilian non-institutional population 15 years of age and over only. According to an unrelated source—Public Sector FMS Reports of the Public Institutions Division of Statistics Canada—in 2001, 12.4% of Canada's military employment or 10,856 persons, were in Nova Scotia. Nova Scotia military employment in 2001 represented a decline of 2.4% from the previous year.
- Wages and salaries in federal public administration within Nova Scotia totaled \$624.3 million in 2001, down 7.2% over 2000 while military wages and salaries increased 5.0% to \$543.7 million in 2001. Wages and salaries in provincial public administration were \$278.4 million in 2001, down 1.5%. Local government public administration wages and salaries increased 3.6% over 2000 to \$163.9 million in 2001.
- The Nova Scotia Government on April 4, 2002 brought down the first balanced budget in 40 years. With this budget, the government has taken the first step toward fiscal sustainability. The 2002-2003 budget calls for prudent expenditure controls and increased provincial revenues. The commitment in the fiscal plan to produce balanced budgets will be achieved by ensuring that expenditure growth remains at a rate lower than revenue growth. In the government's fiscal plan, expenditure growth will be held relatively flat while revenue is projected to grow at a modest rate. The revenue projections from fiscal 2003-2004 onward include the government's commitment to reduce personal income taxes.<sup>(2)</sup>

**Violent Crime**—violent incidents involve offences that deal with force, or threat of force, against an individual. These include homicide, attempted murder, various forms of sexual and non-sexual assault, other sexual offences, robbery and abduction.

**Property Crime**—property incidents involve unlawful acts with the intent of gaining property, but do not involve the use of threat of violence against an individual, e.g., theft, breaking and entering, fraud and possession of stolen goods

**Total Criminal Code (C.C.)**—This total reflects both violent and property crimes, as well as other Criminal Code offences, e.g., damage to property, prostitution. Criminal Code traffic incidents are excluded.

**Number**—the number of “actual” incidents recorded by the UCR Survey refers to the total that have come to the attention of the police and that have been substantiated through police investigation.

**Rate**—Figures represent the total number of incidents per 100,000 population.

<sup>(1)</sup> Of the total number of officers, 8 were under contract to and funded by the Halifax Port Authority, and thus are not available for general policing duties.

<sup>(2)</sup> Includes data for Sydney, North Sydney and Glace Bay

<sup>(3)</sup> Police force closed in early 2001.

<sup>(4)</sup> Police force closed in mid 2000; therefore, expenditures and crime data are not presented.

## International Statistics

207

### GDP Annual Growth, G7/8 Countries, 2001

Note: Comparable figure for Russia not given.

Source: OECD, Main Economic Indicators, July 2002

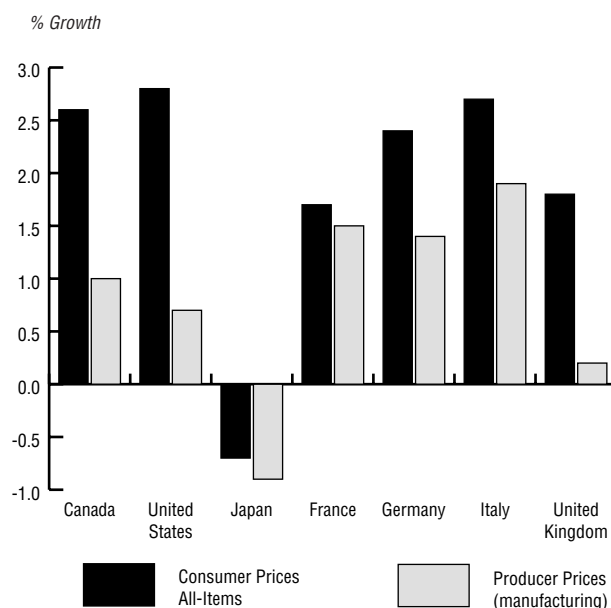

- The G7/8 is an exclusive 23-year old forum for world leaders dealing with economic issues. The original G7—Canada, France, Germany, Italy, Japan, the United Kingdom and the United States have formally brought Russia in as a new member making it G7/G8. More recent gatherings have included:

#### Economic Summits

2002 Kananaskis, Alberta  
 2001 Genoa, Italy  
 2000 Kyushu-Okinawa, Japan  
 1999 Cologne, Germany  
 1998 Birmingham, United Kingdom  
 1997 Denver, Colorado, U.S.  
 1996 Lyon, France  
 1995 Halifax, Canada

- The G7/8 is one of the “more than 32,000 IGOs (intergovernmental organizations) and NGOs (non-governmental organizations). They have their own union—the Union of International Associations—to represent them. Canada is a member of over 2,106 of them.”<sup>1</sup> Key statistical data has been compiled for countries comprising the G7/8 using the resources of a few of these organizations.

### Consumer Price Index, All-Items, and Producer Prices (Manufacturing) G7/8 Countries, Change 2000–2001

Note: Comparable data is not available for Russia.

## **International Statistics** *(continued)*

- <sup>(1)</sup> Calculations based on OECD methodology
- <sup>(2)</sup> Inter-country comparisons should be made with caution; data shown are from available national sources for which definitions may vary from country to country.
- <sup>(3)</sup> Standardized unemployment rates shown are produced by the Statistical Office of the European Communities.
- <sup>(4)</sup> The real effective exchange rate is an indicator of competitiveness which takes into account both export and import competitiveness. A fall indicates improvement in competitive position.
- <sup>(5)</sup> Daily averages of spot-rates quoted for the U.S. dollar on national markets expressed as national currency units per U.S. dollar.
