**Site Description:**

## General Characteristics:

This site is located nearshore in the Northern region of North Harbour, Aspy Bay, North and East of Donalds Island.

## Water Quality:

This site is located within an area classified as “approved” for harvesting of all species of bivalve mollusks by the Canadian Shellfish Sanitation Program as of November 30, 2023.

This site is within the region known to be affected by the MSX.

## Water Depth:

The most recent measurement indicated that the deepest portion of the site was 4.0m. Water depth should be confirmed by proponents at this site.

## Gear Present:

The former licence/lease holder has identified the following aquaculture gear that is currently present within the site: 72 spat collector backlines including rope, sinkers, pyramids and screw anchors. This gear is reported to be in operating condition. Following a Call for Proposals, the Department shall provide a successful proponent with contact information for the former licence/lease holder to offer the purchase of the aquaculture gear on site.

**Site History:**

The previous licence and lease AQ#0083 was first issued in November, 1992, and was subsequently renewed until November 8, 2017.

This site was discontinued on November 8, 2017. As of October 24, 2023, the former licence/lease holder has not been issued a Certificate of Discharge pursuant to Section 62 of the Aquaculture Licence and Lease Regulations.

**Performance Reviews Conducted by Administrator:**

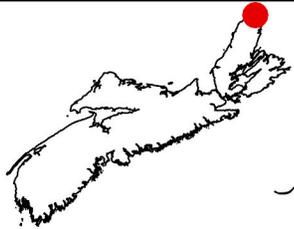

A performance review was conducted on the aquacultural operation of site AQ#0083, pursuant to Sections 71-72 of the *Aquaculture Licence and Lease Regulations* (the “Regulations”). Any concerns raised during the Performance Review have been added to the above site details.

Based on the performance review conducted above, AQ#0083 has been entered into the registry of aquaculture sites available for reallocation in the Province of Nova Scotia under Reference Number RE#9003.
