LIST OF ALLOWABLE PESTICIDES

The Non-essential pesticide legislation enabled the development of the following list of active ingredients.

- Domestic class pest control products containing the following active ingredients can be sold and used on **lawns, outdoor trees, shrubs, flowers or other ornamental plants** provided label directions are followed.
- Commercial class pest control products containing the following active ingredients must be sold by a certified Commercial Vendor and purchased and used by a certified applicator.

All pesticides offered for sale or use in Canada are assessed and registered by [Health Canada's Pest Management Regulatory Agency](#) (PMRA). All pesticide users should carefully read the product label and follow all instructions. Product label information can be obtained by searching the PMRA pesticide label database. <http://pr-rp.hc-sc.gc.ca/lr-re/index-eng.php>
