1.0 POLICY STATEMENT

The Alternative Family Support Program (AFS Program) is one option within a continuum of supports and services provided by the Services for Persons with Disabilities (SPD) Program. This setting allows for placement in an approved, private family home, where support and supervision is provided for up to two individuals unrelated to the AFS Provider. The program expands the range of sustainable options available in the community and allows individual needs to be met in a more flexible and personal manner.

1.1 The goals of the AFS Program are to:

- provide a safe and secure place to live in a family-like setting;
- offer an environment that encourages and supports Residents participation in day to day activities and decisions;
- assist Residents in achieving the highest level of independence possible; and
- support and promote community participation.

1.2 The program provides a family-like setting for individuals who may require varying levels of support and supervision, who may prefer living with a family, and who will benefit from the additional support a family environment can provide. The AFS Program embraces the philosophy of Individual Support Planning and collaboration among the Resident, their family or person acting on their behalf, their personal support network, the AFS Provider, and the Department of Community Services.

1.3 Residents are eligible to receive funding based on their assessed unmet needs for items such as room and board, support and supervision, and respite, as outlined in SPD policy.

Partnering with and accessing a variety of community support resources to address the holistic needs of individuals with disabilities is integral to supporting the Resident, the Provider, and for the effectiveness of this program.
