DOMESTIC CLASS RESTRICTED ACCESS PESTICIDES - 2020

The following list contains Domestic Class pesticides that have been selected based on criteria in the Non-essential Pesticides legislation.

The pesticides on this list cannot be used on **lawns**, **outdoor trees**, **shrubs**, **flowers** or **other ornamental plants**.

- Only individuals who hold a Class 1(B) Domestic Vendor Certificate are permitted to sell pesticides which are allowed for the exceptions to the Non-Essential Pesticides Control Act
- Purchasers are not allowed direct access to pesticides that are on this list. These products must be secured in a way that prevents direct access by the public.

PLEASE NOTE:

The pesticides listed may be used for ***the exceptions to the Non-Essential Pesticide Control Act***. Label directions are the key to determining whether a use is legal or illegal. For example, a weed control pesticide may be labeled for use on lawns and poison ivy. Under the Non-essential Pesticides legislation this weed control product is not permitted for use on lawns, but is permitted for these exceptions.
